

SOUTH GEORGIA GRAND ADVENTURE TOUR

Few places on the planet compare to South Georgia in terms of exotic wildlife and jaw-dropping scenery, and the Falklands are no different. On this exploratory voyage you can see both.

ITINERARY

Day 1: Sandy Argentine beaches

You embark from Puerto Madryn in the afternoon, your prow aimed for the Falkland Islands. Golfo Nuevo is renowned for its visiting southern right whales, so you have a good chance of spotting one as you sail toward the open ocean.

Day 2 - 3: Sea life, sea birds

Though you're now at sea, there's rarely a lonesome moment here. Several species of bird follow the vessel southeast, such as albatrosses, storm petrels, shearwaters, and diving petrels.

Day 4 - 5: Finding the Falklands

The Falkland Islands offer an abundance of wildlife that is easily approachable, though caution is always advised. These islands are largely unknown gems with a wealth of bird life, including many endemic species. The waters of the Falklands are also rich with sea life, including southern sea lions and elephant seals. There is a good chance to see both Peale's dolphins and Commerson's dolphins. During this segment of the voyage, we aim to visit the following two sites: Steeple Jason - Home to the world's largest black-browed albatross colony (roughly 113,000), Steeple Jason is a wild and rarely visited island buffeted by wind and waves. Weather and swell conditions dictate the journey here. Carcass Island - Despite its name, this island is pleasantly rodent-free and hence bounteous with birdlife and many endemic species. Anything from breeding Magellanic penguins and gentoos to numerous waders and passerine birds (including Cobb's wrens and tussock-birds) live here. Other sites that we may offer as an alternative: Saunders Island - On Saunders Island you can see the black-browed albatross and its sometimes-clumsy landings, along with breeding imperial shags and rockhopper penguins. King penguins, Magellanic penguins, and gentoos are also found here. Westpoint Island - Landing in a small cove near the island's house, you will be able to walk through the tussac grass and an abundant breeding colony of black-browed albatrosses, where they live side by side with rockhopper penguins. Grave Cove - Nesting gentoo penguins and excellent hiking opportunities abound here, with the chance to enjoy great scenery and wildlife.

Day 6 - 7: Once more to the sea

En route to South Georgia, you now cross the Antarctic Convergence. The temperature cools considerably within the space of a few hours, and nutritious water rises to the surface of the sea due to colliding water columns. This phenomenon attracts a multitude of seabirds near the ship, including several species of albatross, shearwaters, petrels, prions, and skuas.

Day 8: Shag Rocks

Today we reach the Shag Rocks, a group of six islands surrounded by nutrient-rich waters that offer great feeding grounds for numerous birds and whales. The islands are named after the South Georgian shag, known for its bright blue eyes and yellow beak patch.

Day 9 - 13: South Georgia journey

In our tour of South Georgia's breathtaking wildlife and scenery, we may visit the following sites. Please keep in mind that weather conditions in this area can be challenging, largely dictating the program. Sites you might visit include: Prion Island - The home of the great wandering albatrosses. The previous summer's wandering albatross chicks are almost ready to fledge, and adults are seeking out their old partners after a year and a half at sea. Salisbury Plain, St. Andrews Bay, Gold Harbour - These sites not only house the three largest king penguin colonies in South Georgia, they're also three of the world's largest breeding beaches for southern elephant seals. Only during this time of year do they peak in their breeding

cycle. Watch the four-ton bulls keep a constant vigil (and occasionally fight) over territories where dozens of females have just given birth or are about to deliver. You can also see a substantial number of Antarctic fur seals here during the breeding season (December - January). Fortuna Bay - This beautiful outwash plain from Fortuna Glacier is home to a large number of king penguins and seals. You may have the chance to follow the final leg of Shackleton's route to the abandoned whaling village of Stromness. This path cuts across the mountain pass beyond Shackleton's Waterfall, and as the terrain is partly swampy, be prepared to cross a few small streams. Leith Harbour, Stromness, Husvik - These sites remind us of the scale of the whaling industry in the early 20th century. Elephant and fur seals breed and moult here. Gentoo penguins also occupy the landing sites. Antarctic prions and South Georgia dive petrels may be observed, especially in the area of Husvik. Grytviken - In this abandoned whaling station, king penguins walk the streets and elephant seals lie around like they own the place - because they basically do. Here you might be able to see the South Georgia Museum as well as Shackleton's grave. Cobblers Cove, Godthul - Here we will try to visit Rookery Point to see macaroni penguins. We might also encounter giant petrels, gentoo penguins, seals, and light-mantled sooty albatrosses nesting along the coastline. Godthul (Norwegian for "good cove") was named by Norwegian whalers and seal hunters. Royal Bay (Moltke Harbour, Will Point & Brisbane Point) - Moltke Harbour in Royal Bay was named by the German International Polar Year Expedition in 1882, and some of the remains of their dwellings are still visible. The scenery of Royal Bay is amazing, with dark sandy beaches, green tussocks, and of course, the great Ross Glacier. It may be windy here, but the Zodiac cruising is spectacular. Roughly

30,000 pairs of king penguins also live in this area. Cooper Bay - A Zodiac cruise in Cooper Bay offers a good chance to see macaroni penguins, gentoo penguins, and one of the world's largest chinstrap penguin rookeries. Fur and elephant seals may be seen on the beach, while we might also spot light-mantled sooty albatrosses gliding overhead. Antarctic terns, white-chinned petrels, and blue-eyed shags are possible here too. Drygalski Fjord - This narrow waterway offers spectacular landscapes, specifically high mountain peaks at a very close distance. Annenkov Island - Passing Pickersgill Islands, we reach the rarely visited Annenkov Island, first discovered by James Cook in 1775 and later renamed by the Russian expedition of Fabian von Bellingshausen in 1819. This is a rocky terrain with a variety of ridges, peaks, and hills where fossils have been found. King Haakon Bay - Few Antarctic locations are more steeped in expedition history than this one. British explorer Ernest Shackleton reached King Haakon Bay during his arduous open-boat voyage from Elephant Island, where his crew was stranded after sea ice crushed their ship. Elephant seals dominate these rugged beaches, and birdwatchers should keep a lookout for South Georgia pipits, Antarctic prions, common diving petrels, and blue petrels.

Day 14 - 17: Westward bound

South polar skuas and snow petrels could join the albatrosses trailing our vessel during these sea days, and we may also encounter sea ice. When we reach the Drake Passage, you will be again greeted by the vast array of seabirds remembered from the passage south.

Day 18: Earth's southernmost city

You arrive and disembark in Ushuaia, commonly held to be the world's most southern city. It is located on the Tierra del Fuego archipelago, nicknamed the "End of the World." But despite this stopping point, the wealth of memories you've made on your Antarctic expedition will travel with you wherever your next adventure lies.

Please Note:

All itineraries are for guidance only. Programs may vary depending on ice, weather, and wildlife conditions. Landings are subject to site availabilities, permissions, and environmental concerns per IAATO regulations. Official sailing plans and landing slots are scheduled with IAATO prior to the start of the season, but the expedition leader determines the final plan. Flexibility is paramount for expedition cruises. The average cruising speed for our vessel is 10.5 knots.

YOUR SHIP: HONDIOUS

YOUR SHIP:

Hondius

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

Hondius is the first-registered Polar Class 6 vessel in the world, meeting the latest and highest Lloyd's Register demands for ice-strengthened cruise vessels. Hondius also exceeds the requirements of the Polar Code as adopted by the International Maritime Organization (IMO), allowing you to enjoy the polar regions as much as possible while impacting them as little as possible. Upon completion, Hondius will be the most flexible, advanced, innovative ice-strengthened vessel in the polar regions. It is optimized for exploratory voyages that provide you the utmost first-hand contact with the Arctic and Antarctica. Hotel comfort, expedition class Hondius offers high-quality accommodation for 176 passengers in a range of suites and cabins. The spacious 'Hondius' suite (35 square metres, 377 square feet), six grand suites with balconies (27 square metres, 291 square feet), eight junior suites (19 to 20 square metres, 205 to 215 square feet), eight superior cabins (20 to 21 square metres, 215 to 226 square feet), 11 twin deluxe cabins, (19 to 21 square metres, 205 to 226 square feet), 14 twin window cabins (12 to 14 square metres, 129 to 151 square feet) as well as 28 twin porthole cabins, two triple porthole cabins, and four quadruple porthole cabins that vary in size from 12 to 18

square metres, or 129 to 194 square feet all offer a high level of accommodation. The passenger capacity certificate for Hondius is 196 persons. One deck consists of a large observation lounge and separate lecture room, which are reserved for a wide variety of interactive workshops, exhibitions, and performances particular to Hondius. Though elegantly designed in stylish mid-century modern decor, this vessel holds true to Oceanwide's distinctive cozy and informal atmosphere. Swift & safe ship-to-shore operations. It is the philosophy of Hondius' managers to keep sea time as short as possible so that they can focus instead on fast, effective access to shore and near-shore activities. To give you the maximum contact with the nature and wildlife you traveled so far to see, they employ a tough fleet of rigid-hull inflatable Zodiac boats that guarantee swift and safe landing operations for all passengers at the same time. Hondius has two separate gangways and a sheltered indoor Zodiac embarkation platform that can also be used for special outdoor activities, such as kayaking. The fast, flexible, friendly heart of the polar regions. The top priority is taking advantage of every wildlife and terrain opportunity as it occurs. To keep the itineraries flexible itineraries and the response time rapid, Hondius is equipped with advanced stabilizers and two main engines capable of powering the vessel up to 15 knots. But Hondius sacrifices no warmth to achieve its keen polar edge: You will have 72 crew and staff members (including expedition and hotel staff) at your service while on board, ensuring that what little time you do spend on the ship you will spend comfortably
