

SPIRIT OF ANTARCTICA EXPEDITION FEATURING THE CHILEAN FJORDS

Embrace the spirit of polar exploration on this classic expedition to the coveted white continent. Sail across the famed Drake Passage to and from Antarctica, admiring spectacular seabirds and approaching the ice as the explorers of old did: by sea. With a chance to Zodiac cruise through pack ice, set foot on the continent, choose from a range of adventure options and even perhaps camp under pastel polar skies, this is the quintessential Antarctic voyage for adventure-lovers.

ITINERARY

Day 1 Arrive Punta Arenas

Arrive in Punta Arenas, where you will be met by a representative of Aurora Expeditions and transferred with your

fellow expeditioners to your assigned pre-voyage hotel. If you are already in Punta Arenas, we ask you to make your way to your hotel. Check-in is from 3.00 pm. Upon arrival, please visit the Aurora Expeditions hospitality desk in the lobby between 3.00 pm and 7.00 pm, to collect your luggage cabin tags, and confirm if you wish to join our Punta Arenas tour tomorrow. Our team will confirm details regarding your embarkation day, answer any questions and provide you with information about where to dine or purchase last minute items. Expeditioners arriving after 7.00 pm will find a welcome pack waiting for them at check-in. We ask you to visit our hospitality desk tomorrow between 8.00 am - 10.00 am. The remainder of your time is at leisure. All meals today are at your own expense. Assigned accommodation: Cabo De Hornos

Day 2 Embarkation

This morning, enjoy breakfast and check-out. Please ensure your cabin luggage is fitted with cabin tags clearly labelled with your name and cabin number. Take your cabin luggage to hotel reception, prior to, or at check-out. Your luggage will be stored and transferred directly to the port for clearance, to be placed in your cabin ahead of your arrival on board. Please keep any valuables or personal items with you throughout the day. The township of Punta Arenas was founded in the 1500s and is the gateway to the Strait of Magellan. It was originally established as a prison colony and later the biggest commercial and supplying centre of all vessels travelling between the Pacific and Atlantic Ocean. The town has since made a name for itself as the central base for exploring Patagonia and Antarctica. At first glance, Punta Arenas may not seem like much of a destination,

but if you have time to walk around, you'll discover many unique and interesting things to see in this southern town. One thing you may notice is the colonial-style architecture, including Palacio Sara Braun, built in the late 1800s. At the centre of Punta Arenas' old town is Plaza Muñoz Gamero, the park-like square surrounded by tall trees and a lush vegetation. In the middle of the plaza is a statue dedicated to Ferdinand Magellan, discoverer of the Strait of Magellan and the first European to cross the Pacific Ocean. We recommend a walk along the waterfront promenade, from which you will see the island of Tierra del Fuego and the Strait of Magellan in the distance. You will also be able to see the Maritime Monument, representing the first settlers in the area, many shipwrecks abandoned from old trading days, and you may also be lucky enough to see the cormorants taking off over the sea. At approximately 4.00 pm, you will be transferred to the port for embarkation. Once aboard, you'll have time to settle into your cabin before our important mandatory briefings. As the ship pulls away from port, we'll gather on the deck to farewell Punta Arenas and commence our adventure to Antarctica. This evening get to know your fellow expeditioners and friendly expedition team and crew at a welcome dinner to celebrate the start of a thrilling adventure to Antarctica.

Days 3 Chilean Fjords

Sail along the legendary Beagle Channel and enjoy splendid scenery of fjords and channels flanked by majestic mountains. Keep watch for the many seabirds and marine wildlife including dolphins, sea lions and whales preparing to migrate to Antarctica to fatten up on plentiful krill. In the evening, we exit

Nassau Bay, sail past Cape Horn and prepare to enter Drake Passage.

Days 4-5 Drake Passage Crossing

As we commence the Drake Passage crossing, we make the most of our time getting comfortable with the motions of the sea. Our expedition team prepare you for our first landing with important wildlife guidelines and biosecurity procedures and start our lecture program to help you learn more about Antarctica's history, wildlife and environment. Our wildlife experiences begin as we enjoy watching and photographing the many seabirds, including majestic albatrosses and giant petrels following our vessel. On sea days, you may can enjoy the facilities on board the vessel including the gym, wellness centre or the relaxing in one of the observation lounges. Nearing the South Shetland Islands and the tip of the Antarctic Peninsula on the afternoon of day four, the excitement is palpable with everyone converging on one of the observation decks watching for our first iceberg. The ocean takes on a whole new perspective once we are below the Antarctic Convergence and are surrounded by the surreal presence of floating ice sculptures. The memory of your first big iceberg sighting is likely to remain with you for a lifetime. Time and weather permitting, we may attempt our first landing in Antarctica by late afternoon.

Days 6-10 Antarctic Peninsula

It is almost impossible to describe the feeling of arriving in Antarctica. Spotting your first iceberg and taking a deep breath of some of the most fresh, crisp air on earth is an experience

that will stay with you forever. Once we arrive, the western side of the Antarctic Peninsula and the South Shetland Islands are ours to explore, and we have a host of choices available to us. Because we are so far south, we will experience approximately 18-24 hours of daylight and the days can be as busy as you wish. Your experienced expedition team, who have made countless journeys to this area, will use their expertise to design your voyage from day to day, choosing the best options based on the prevailing weather, ice conditions and wildlife opportunities. We generally make landings or Zodiac excursions twice a day. You will want to rug up before joining Zodiac cruises along spectacular ice cliffs or among grounded icebergs, keeping watch for whales, seals and porpoising penguins. Zodiacs will also transport you from the ship to land, where you can visit penguin rookeries, discover historic huts and explore some of our favourite spots along the peninsula. While ashore we aim to stretch our legs, wandering along pebbly beaches or perhaps up snow-covered ridgelines to vantage points with mountains towering overhead and ice-speckled oceans below. If you have chosen an optional activity, you will have the option to do participate in the activity whenever conditions allow, and of course keen polar plungers will have the chance to fully immerse themselves in polar waters - conditions permitting! The polar plunge can take place at any time during the voyage, so listen out for the announcement from the expedition team and get ready for the most exhilarating dip of your life! In addition to Zodiac cruises and shore excursions, we may ship cruise some of the narrow, dramatic straits separating offshore islands from the mainland, or linger in scenic bays to watch whales travelling or feeding. This is a great time to enjoy the observation lounge or make your way to the bridge (open at the captain's discretion) for uninterrupted views of Antarctica in all its

splendour. Listen out for the creak and deep rumble of glaciers as they carve into sea. Take a quiet moment to experience the wonder of the pristine paradise of the splendid white continent.

Days 11-12 Drake Passage Crossing

Enjoy a final morning landing in the South Shetland Islands before we re-enter the Drake Passage for our return journey to South America. With lectures and film presentations to complete our Antarctic experience, there is still plenty of time to enjoy the magic of the Southern Ocean and the life that calls it home. There is time for reflection and discussion about what we have seen and experienced. We hope you become ambassadors for Antarctica telling your family, friends and colleagues about your journey to this magical place, advocating for its conservation and preservation so that they might one day visit the region to experience what you have been lucky to see and do here. As we approach the tip of South America, our Captain may sail close to legendary Cape Horn, weather and time permitting.

Day 13 Disembark Ushuaia

During the early morning, we cruise up the Beagle Channel, before quietly slipping into dock in Ushuaia, where we will be free to disembark around 8.00 am. Farewell your expedition team and fellow passengers as we all continue our onward journeys, hopefully with a newfound sense of the immense power of nature. On disembarkation, passengers on flights departing prior to 14:00 will be transferred directly to Ushuaia Airport, while those fortunate enough to be continuing their travels in this spectacular region of the world, will be transferred

to their post-voyage Ushuaia accommodation. Passengers flying after 14:00 will have time to explore Ushuaia, prior to an afternoon airport transfer, the details of which will be provided onboard prior to disembarkation. Note: At the conclusion of the voyage, we do not recommend booking flights departing Ushuaia prior to 12.00 pm on the day of disembarkation in case there are delays.

YOUR SHIP: SYLVIA EARLE

YOUR SHIP: Sylvia Earle

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

Sylvia Earle made her inaugural cruise in 2022; she honours the highly accomplished marine biologist, oceanographer and explorer, Sylvia Earle. As the first female chief scientist of the U.S. National Oceanic and Atmospheric Administration, and named by Time Magazine as its first Hero for the Planet in 1998 - this vessel pays tribute to Sylvia's long standing conservation efforts for marine protected areas and ocean wildlife. Sylvia Earle will be actively involved in the development of her namesake. The streamlined Ulstein X-BOW® cuts through the swell so you feel fewer vibrations and disturbances, and makes quicker transits through waves. It also helps reduce fuel consumption by up to 60%^.

Experience the Glass Atrium Lounge inside the bow, featuring huge windows and superb views to the front of the ship. In between landings, enjoy the heated saltwater open air swimming pool and jacuzzis on board the Sylvia Earle and watch the world go by, or experience our gym, sauna or enjoy a massage (additional cost) in the Wellness centre. Sylvia Earle carries many Zodiacs, which you can board via four dedicated, sea-level launching platforms. These platforms make boarding the Zodiacs as quick, efficient and safe as possible, minimising wait times and getting you

closer to the action for longer. Dining One of the most important parts of any expedition is the food! Whatever adventures the day holds, you will be fuelled-up with hearty meals and delicious morning/afternoon teas cooked by our onboard chefs. Meals are a great time to soak up the expedition camaraderie in our open seating dining area. Share stories with your fellow travellers and ask our expedition team questions that may have come up during the day. Tea, coffee and snacks are available 24 hours a day, and our chefs offer different menu options and courses for each meal. Enjoy the range of house wine, beers and soft drinks included with dinner after a long day in the wild. We also invite you to join your captain and expedition team for informal Captain's Welcome and Farewell drinks, with complimentary beverages and cocktail appetisers, followed by a 3 course meal. Responsible Travel We believe that preserving and protecting the environment is of the utmost importance and this is reflected in several features of the Sylvia Earle. The Sylvia Earle will boast one of the lowest polluting marine engines in the world due to low energy consumption, high fuel-efficiency and a streamlined design to deliver an 80% reduction in emissions. The ship can also utilise virtual anchoring to hold its position using a combination of GPS, steering technology, propellers and thrusters. This protects the sea floor and minimises the damage caused by conventional anchors. Compared to Tier
