

11 DAYS LUXURY KIMBERLEY CRUISE - DARWIN TO DARWIN

Immerse yourself in Australia's furthest reaches -- a wild region where extraordinary things happen. From the surreal churn of forceful tides in the Buccaneer Archipelago to the profound stillness of Gwion Gwion rock art. Sail from tropical Darwin into the diversity of the Kimberley, a vivid red coastline of life-filled reefs, croc-lined mangrove rivers, and thrilling waterfalls.

ITINERARY

Day 1 - Darwin

Named in honor of Charles Darwin by British settlers, Darwin is Australia's northernmost capital city, located 2,000 miles from Sydney and Melbourne. Crocodiles patrol the jungled waterways surrounding the city, and the nearby Kakadu National Park is accessible by airboat. Darwin was directly attacked by the Japanese air force in 1942, and Cyclone Tracy devastated the city in 1973, both events documented in local museums.

Day 2 - Day at sea

Days at sea are the perfect opportunity to relax, unwind, and pursue personal interests, whether visiting the gym, the spa, or simply watching for whales from deck. These blue sea days offer an ideal balance to busy days spent exploring ashore.

Day 3 - Wyndham, Australia

Wyndham, at the head of the Cambridge Gulf where several Kimberley rivers converge, was established in 1886 during the Halls Creek gold rush and remains one of Western Australia's most remote ports. The Ord River, accessible by boat from here, offers freshwater crocodiles, rock wallabies, and extraordinary birdlife in a tidal river landscape of great natural character.

Day 4 - Vansittart Bay (Jar Island), Australia

Vansittart Bay, near the northern tip of Western Australia, holds two of the Kimberley's most significant rock art sites on Jar Island -- galleries of both Gwion Gwion and Wandjina styles in close proximity. The Anjo Peninsula beyond holds a World War II C-53 aircraft wreck remarkably intact on the beach, adding an unexpected historical layer to one of Australia's most remote coastlines.

Day 5 - Ashmore Reef, Australia

Situated 630 kilometres off Broome, Ashmore Reef Marine Park is an Australian External Territory covering 583 square kilometres in the Indian Ocean. More than 40 bird species use the reef, with 100,000 seabirds breeding there each year, including crested terns, white-tailed tropicbirds, and greater frigatebirds, alongside migratory shorebirds travelling from as far as Siberia. The surrounding waters shelter around 500 fish species, marine turtles, and dugongs within a declared Sanctuary zone.

Days 6 - 7 Buccaneer Archipelago Region, Australia

The Buccaneer Archipelago off Western Australia comprises around 800 islands and produces extraordinary tidal phenomena, including the horizontal reversible waterfall in Talbot Bay. Montgomery Reef appears to rise from the sea as the tide drops, revealing cascading waterfalls and marine life including turtles and manta rays. Aboriginal guides welcome guests at Freshwater Cove with traditional ochre ceremonies, and nearby rock art caves can only be visited with local guides.

Day 8 - Hunter River Region (Western Australia), Australia

The Hunter River in the Kimberley is home to an immense mangrove system surrounded by soaring red sandstone cliffs, with narrow channels sheltering bird species, mudskippers, fiddler crabs, and saltwater crocodiles. Naturalist Island at the river's mouth has a sandy beach used as a landing site for helicopters heading inland. The Mitchell Falls, four tiers of waterfalls plunging into deep pools, are the inland highlight.

Day 9 - Swift Bay, Australia

Swift Bay, on the Kimberley Coast, holds Wandjina rock art galleries of exceptional quality -- sacred paintings of ancestral spirit beings maintained by the Wunambal Gaambera people over thousands of years. A short Zodiac ride and 250-metre walk across the rocky landscape leads to cave galleries where two distinct styles of Indigenous art -- Gwion Gwion and Wandjina -- can be observed side by side.

Day 10 - King George River (Kimberley, Western Australia), Australia

The King George River in the Kimberley offers a Zodiac journey through winding channels framed by towering red cliffs and ancient geological formations. Saltwater crocodiles bask along the banks and Brahminy Kites soar overhead during the cruise.

The area is rich in deep geological history and the wild spirit of Australia's remote northwest.

Day 11 - Darwin, Australia

Named in honor of Charles Darwin by British settlers, Darwin is Australia's northernmost capital city, located 2,000 miles from Sydney and Melbourne. Crocodiles patrol the jungled waterways surrounding the city, and the nearby Kakadu National Park is accessible by airboat. Darwin was directly attacked by the Japanese air force in 1942, and Cyclone Tracy devastated the city in 1973, both events documented in local museums.

YOUR SHIP: SILVER CLOUD

YOUR SHIP: Silver Cloud

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

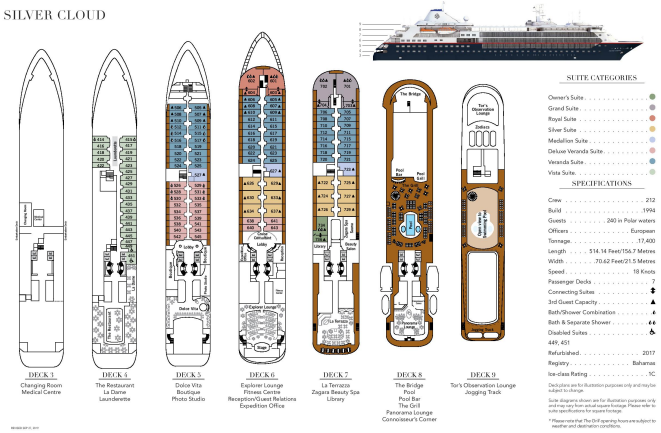

BUILT/REFURBISHED:

With 18-brand new Zodiacs, four superlative restaurants in Antarctica and a pole to pole expedition itinerary, Silver Cloud really does break the ice between expedition and luxury. Spacious yet intimate, designed to cross oceans and yet able to slip up rivers and into hidden harbours with ease, the yacht-like Silver Cloud carries just 296 guests in incomparable comfort and style. Combining spacious ocean-view suites and private verandas with stunning dining and entertainment options, Silver Cloud provides world-class cruise accommodations, service and amenities. After extensive refurbishment, Silver Cloud is the most spacious and comfortable ice class vessel in expedition cruising. Her large suites, her destination itineraries and her unparalleled service make her truly special. Her four dining options will tantalise your taste buds and as 80% of her suites include a veranda, watching a breaching whale or a few cavorting penguins has never been so personal. She carries a limited number of guests in polar waters, meaning that Silver Cloud has the highest space to guest and crew to guest ratios in expedition cruising. With her 18 zodiacs, 10 kayaks, possibilities are almost limitless with ship-wide simultaneous explorations.
