Days 0 - 1 - Pre Cruise & Longyearbyen

Longyearbyen is the biggest settlement in Svalbard. Seat of the Norwegian administration, it also has the best services and infrastructure in the archipelago. Located deep in the

Adventfjord, a sidearm of the Isfjorden (Icefjord), Longyearbyen's airport can be used all-year round, but its harbor is blocked by ice in winter. Most shops, hotels, restaurants and a hospital are within easy walking distance of the port. One of the most prominent buildings in town is the UNIS center, where several Norwegian universities have joined forces to operate and offer the northernmost higher education to both Norwegian and international students. Adjacent to UNIS, and well worth a visit, is the Svalbard Museum, covering the natural history and exploitation of Svalbard. Remnants of the former mining activity can be seen all around Longyearbyen and even in town.

Days 2 - 4 - Svalbard Northern Region

Svalbard's northern region is less influenced by the Norwegian Current coming through the Greenland Sea than the southern region and shows more ice. The northern part of the island of Spitsbergen shows quite a number of impressive fjords, bays and glaciers. The Nordaust Svalbard Nature Reserve includes Spitsbergen's east coast, the Hinlopen Strait, Nordaustlandet and some islands further east like Kvitoya and Storoya. Several walrus haul-outs, spectacular glaciers, bird cliffs and bird islands, as well as surprising flora in Arctic deserts and the possibility to see polar bears and to visit historically important sites make this an area prone for exploration. Ice conditions will dictate which sites can be seen.

Days 5 - 7 - Svalbard Southern Region

Svalbard's Southern Region and specifically Spitsbergen's west coast is less ice-clogged than the rest of Svalbard due to the moderating influenced of the Gulf Stream. Several fjords cut into the western coast of Spitsbergen and have been used by trappers and hunters, as well as the different mining companies that tried to exploit the riches of the archipelago's largest island of Spitsbergen. Remains of huts and mines, as well as active commercial and scientific settlements can be found and visited. Depending on the time of the season, glaciers can be visited on foot or by sea. Hornsund will reveal fascinating views of geological formations, craggy mountains, spectacular glaciers and a variety of seabirds and seals.

Day 8 - Longyearbyen

Longyearbyen is the biggest settlement in Svalbard. Seat of the Norwegian administration, it also has the best services and infrastructure in the archipelago. Located deep in the Adventfjord, a sidearm of the Isfjorden (Icefjord), Longyearbyen's airport can be used all-year round, but its harbor is blocked by ice in winter.
