ocean and is most attractive on a full moon! In 1801, French navigator Nicolas Baudin stopped here during his explorations of Australia and left his mark on the region at Geographe Bay, named after his flagship Geographe and Cape Naturaliste, after the ship Naturaliste.

HAMELIN BAY & MARGARET RIVER

Hamelin Bay is located on the southwest coast on a serene open sandy bay, famous for the abundance of stingrays which frequent the bay. Snorkel with these friendly giant rays, which can measure up to 2 meters wide, and love to swim up close to snorkellers. With clear and calm water, this is a great snorkel spot for all levels to enjoy interesting fish and plant life in the bay, and some great rocks and shipwrecks further out for those more confident in the water. After a morning in the water there will also be time for the bird enthusiasts on a walk to the nearby freshwater lake to look for water birds including the Grey Teal, Purple Swamphen and Grebes. We will also visit the beach for possible sightings of the Hooded Plover. A quintessential Western Australian destination, Margaret River is flanked with national parks including towering forests, pristine coastlines, and rugged granite outcrops. Spend the afternoon enjoying this beautiful countryside of the Margaret River region as we relax on a luxury coach tour of the wineries in this area. Enjoy tastings and cellar-door visits to some of the leading Margaret River wineries.

AUGUSTA

Augusta is the most south-western town in Australia and is nearby to the towering karri timber of Boranup Forest and spectacular Jewel Cave. The south west coast was first seen by explorers in 1622 from the Dutch ship Leeuwin. Then expeditions by French explorers De Freycinet, D'Entrecasteaux,

Baudin and Hamelin sighted the coast in the late 18th to early 19th century. Captain Matthew Flinders charted the south west coast from 1801 to 1803 and proved that Cape Leeuwin was part of the mainland. With the arrival of settlers, Augusta was founded in 1830. The subsequent increase in ship traffic over the next few decades led to the construction of the impressive Cape Leeuwin Lighthouse 1896. Here, we will climb Cape Leeuwin Lighthouse, the tallest lighthouse on mainland Australia overlooking the point where the mighty Southern and Indian Oceans collide. We will also visit Jewel Cave, an awe-inspiring and extremely well decorated cave, containing many beautiful examples of delicate helictites, cave coral, pendulites, a very large stalagmite called 'The Karri Forest', and beautiful examples of flowstone such as 'The Frozen Waterfall' and 'the Organ-pipes'. Remarkably, fossilised remains of several Tasmanian Tigers have been discovered within Jewel Cave, more than 3000 years after the thylacine became extinct on mainland Australia. In the afternoon, enjoy free time to explore the town before re-joining Coral Geographer.

BREAKSEA ISLAND & ARPENTEUR NATURE RESERVES

This morning we arrive at Breaksea Island, named by George Vancouver during his expedition in 1791. While in the area he also took possession of the lands for England. He named the islands after its beaten appearance and the protection it offered to the landward side from the south-westerly winds. In the morning we will spend time observing seals in their natural habitats at Seal Cove. The playful and curious fur seals and Australian seal lions have made their home on the north side of Breaksea Island. Watch as they laze on nearby rocks or glide gracefully through the water. In the afternoon we will spend time exploring Arpenteur Nature Reserves, with the chance to see rare

birds including Noisy Scrubbird, Red-Winged Fairywren, Southern Emu-Wren or New Holland Honeyeater. Following your walk enjoy a swim to freshen up!

BREMER BAY & POINT ANN

The peaceful coastal town of Bremer Bay, population 230, is renowned for having some of the most beautiful beaches in the world. Located on the edge of the Southern Ocean, these vast stretches of pristine white sand offer a peaceful spot to stroll or swim, especially in summer. Explore the variety of small and large beaches around the area, and spend your afternoon relaxing, swimming, or snorkelling in the clear blue waters. The genuine pristine surroundings and deep peacefulness, along with the opportunity to observe the unique flora of the area and possibly witness some of the abundant marine life in the bay, makes Bremer Bay a true highlight on our voyage. In the afternoon we visit Point Ann, located in the Fitzgerald National Park. The Point Ann platform is known to be a good vista for lookouts, while the 1.5km easy bush walk follows the site of the original rabbit proof fence, with superb views over Point Charles Bay.

WOODY ISLAND - RECHERCHE ARCHIPELAGO

This morning, we enter the Recherche Archipelago, a group of 105 islands and many more rocky outcrops. Here, many species of birds as well as sea lions and fur seals, come to breed. The islands are scattered across the blue water – a beautiful seascape when viewed from shore with turquoise waters washing against grey and tan-coloured granite. Here, we will land at Woody Island to explore. Located just 15km off the coast of Esperance, Woody Island's stands of tall trees have given it its name. Surrounded by pristine, clear waters, you will have the opportunity to experience the snorkel trail in

Shearwater Bay. The cool southern waters provide excellent visibility for your journey of discovery. There are several beautiful walks on the island, from easy to moderate, and you will appreciate the spectacular views across the archipelago along the way. For the bird lovers, a wide variety of bird life is sighted on the island, from land dwellers to those dependent on the sea. Spot Singing & New Holland Honeyeaters, Silvereyes, Red-eared Firetails, Rock Parrots and Sacred Kingfisher. While along the walk trails catch a glimpse of the Golden Whistlers, Brown Quails, Spotted Pardalotes, Brush Bronzewing, Raptors and Fan Tailed Cuckoo.

CAPE LE GRAND NATIONAL PARK - LUCKY BAY

Cape Le Grand National Park's massive granite peaks, rolling heathlands and curving white beaches are some of the most spectacular landscapes along the southern coast. Along quiet Lucky Bay, kangaroos are known to laze on the whitest sand in Australia. The turquoise water is wonderful for a quick swim, and if time permits, we will enjoy a moderate hike on part of the Le Grand Coastal trail. The Cape Le Grande coastal trail passes through beautiful coastal scenery, and the national park is home to pygmy possums, western grey kangaroos and many colourful native wildflowers.

YOKINUP BAY, CAPE ARID NATIONAL PARK

The wilderness of Cape Arid, nearly pristine due to its remoteness, is an important conservation area for 1100 species of plants and more than 160 bird species, many of which are threatened or endangered. Broad white beaches washed by blue seas create a beautiful vista at Yokinup Bay, an absolutely unmissable view. Here we will discover the Thomas River estuary for birdwatching – you might spot honeyeaters, pied oystercatchers and hooded plovers, among many others. In the

heart of the Cape Arid wilderness is the Thomas Fishery, an 1870s whaling station where the whalers processed their catch. The station was set up here due to the abundance of southern right whales, which still gather close to shore to give birth and nurse their young. We may have the opportunity to visit the location, although little remains of the original station.

CROSSING THE BIGHT

Our crossing of the Great Australian Bight is an exciting moment for those who love the sea. This iconic marine area includes the Great Australian Bight Marine Park, which protects an area of global importance for endangered southern right whales. These waters also support important populations of the endangered Australian sea lion, with up to 80% of the population found here. The seals haul out at the base of the 100-metre-high cliffs.

STREAKY BAY

Streaky Bay and the surrounding district are renown for the great variety of landscapes, from largely untouched native scrubland and farming country to cliffs and extensive surf beaches. In the morning, enjoy a walking tour of the town, ending at the museum. In the afternoon we will explore Point Labbatt Loop and Muphys Haystack, a pink granite formation that have been dated at 1590 million years old.

COFFIN BAY

Surrounded by sea and National Parks, today we discover the tranquil bays by taking a swim, snorkel, or kayak and enjoy the local marine life and water ways before finishing our day enjoying a once-in-a-lifetime culinary experience. Wade out into the water and taste fresh Pacific and the native Angasi oysters straight out of the sea and learn firsthand how to shuck an oyster. Throughout the day, learn about the history of Coffin Bay

and the Oyster farming practices of the famous Coffin Bay Oyster. Prepare for a seafood tasting sensation!

ARRIVE ADELAIDE

Arrive in Adelaide at 2:00pm for an 2:30pm disembarkation. A complimentary post-cruise transfers to the airport or CBD will be available.

Please Note:

The above itinerary is indicative. No two cruises with Coral Expeditions will be the same, with each expedition crafted by our experienced Masters and Expedition Leaders. Throughout the expedition, we may make changes to the itinerary as necessary to maximise your expeditionary experience. Allowances may be made for seasonal variations, weather, tidal conditions and any other event that may affect the operation of the vessel. Coral Expeditions suggests that you plan to arrive prior to, not on the day of embarkation, or depart later than the day of disembarkation due to any changes that may occur in scheduling.

YOUR SHIP: CORAL ADVENTURER

YOUR SHIP: Coral Adventurer

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

Launched in 2018 with her maiden voyage in 2019, Coral Adventurer has been designed and built to take you closer to unspoilt vistas in comfort, style and safety. A culmination of two years of design and three decades of passion for expedition cruising. BIGGER IS NOT BETTER At a time when cruise ships get larger and glitzier, we remain stubbornly compact and intimate. Our ships are designed to take you to unspoilt destinations not accessible to large ships. We want you to have the luxury of space, dine with whom you please, or find your quiet corner on deck. So Coral Adventurer has just 60 spacious cabins. This preserves the intimate atmosphere we are known for without sacrificing the stability and comfort of a true ocean going vessel. BUILT FOR DISCOVERY The Coral Adventurer features the trademark dual 'Xplorer' tenders cradled on a hydraulic platform slung off the back of the ship, enabling our guests to go ashore in comfort and ease. The shallow draft of the ship enables us to go closer to shore than larger ships. Together with a renowned expedition team, this new ship will offer the most advanced expedition capabilities of any small ship afloat. BUILT FOR COMFORT With active stabilisers dampening sea motion, mostly balcony cabins, and interiors designed with the colours and

textures of tropical Queensland, the Coral Adventurer is a comfortable ship. She features promenade decks, generous communal areas that accommodate all guests, a passenger elevator, and an open kitchen where you can observe our chefs whip up small batch cuisine from locally sourced ingredients. BUILT FOR PERSONAL SERVICE The Coral Adventurer will continue a proud tradition of Australian flagged vessels with friendly and professional Australian crew. The onboard atmosphere remains refreshingly informal and intimate. Take your seat at our bridge lounge, chat with the captain at your leisure or accompany our chefs on a market tour. Food and wine features Single seating dining area with communal 'wine table' finished with Australian stone; serving buffet breakfast and lunch, and multi-course table d'hote dinners Showcase galley visible to guests for fresh small-batch cuisine featuring Australian produce Multiple indoor and outdoor bars, including the Explorer bar on the sundeck for sunset drinks with 180 degree views Curated wine cellar featuring modestly priced boutique wines for daily drinking and exceptional vintage Australian reds. Guest comfort All outside guest cabins with en-suite bathrooms; majority have private balcony Active stabilisers to dampen sea motion Gym equipped with elliptical trainers and treadmills Passenger elevator Wi-Fi available in all
