BAJA CALIFORNIA: A REMARKABLE JOURNEY ABOARD NG VENTURE

Board small boats and venture into the gray whale birthing lagoons on the Pacific side of the Baja California Peninsula to get up close with these gentle giants. Then, spend over a week in the Gulf of California exploring waters teeming with whales, pods of dolphins, and leaping rays. The wild islands here offer the chance to hike desert arroyos through forests of cacti to revel in the beauty of untamed nature. Revel in Mexico's coastal waters with daily activities that immerse you in the region including Zodiac cruises, kayaking, and snorkeling.

DAY 1 Loreto / San Carlos / Embark Ship

Arrive in Loreto by early afternoon for transfer to San Carlos. Embark National Geographic Venture in the evening. Meals Included: Breakfast, Dinner

DAY 2 Bahía Magdalena

Explore the ever-shifting sand dunes of Isla Magdalena on a cross-island walk to one of the most pristine beaches in the Pacific. Bird-watching can be excellent here, with abundant seabirds in action and shorebirds patrolling the beaches as they fatten up and prepare for long journeys to Arctic breeding grounds. Meals Included: Breakfast, Lunch, Dinner

DAYS 3-4 Laguna San Ignacio

Laguna San Ignacio is a large bay and favored haunt of the gray whales in Baja California. The ship anchors at the mouth of this remote and important area. We explore the lagoon via local pangas with expert local guides. For some reason, the whales here seem to be friendlier than they are elsewhere. It is not unusual for mothers and calves to approach our boats, the calves often playing hide and seek—sometimes even welcoming a touch or a friendly chin scratch. Meals Included: Breakfast, Lunch, Dinner

DAY 5 At Sea

Enjoy the ship's amenities, attend expert-led talks, and watch for a wide variety of marine life, including the largest animal on Earth, the blue whale, as we travel south along the Pacific coast of the peninsula. Meals Included: Breakfast, Lunch, Dinner

DAYS 6-14 Islands of the Gulf of California

Cruise past the spectacular Friars Rocks at Land's End. For those who wish, we can arrange a visit to the historic town center of San José del Cabo. Isla San Pedro Mártir, Los Islotes, Isla San Francisco—these are some of the melodious names of islands scattered throughout this beautiful sea. After decades of exploration here, we are still discovering new places and experiencing exciting events: Bow-riding bottlenose dolphins, sperm whales near our ship, or a pod of fin whales feeding around a convergence zone. The best areas for whale watching remain consistent—the waters south of Isla del Carmen, Canal de Ballenas up north, and near the mouth of Bahía Concepción. Whether on the bridge of the ship, on Zodiacs, or kayaks, we are in prime position to observe them all. Meals Included: Breakfast, Lunch, Dinner

DAY 15 Loreto / Disembark Ship

Disembark in Loreto after breakfast and transfer to the city center. Take the opportunity to visit the first mission in Baja California, as well as the nearby museum to learn more about what makes this town so special. Enjoy free time to explore quaint shops and vibrant side streets. After lunch transfer to Loreto Airport for flights home. Meals Included: Breakfast, Lunch

YOUR SHIP: NATIONAL GEOGRAPHIC VENTURE

YOUR SHIP: National Geographic Venture

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

Launched 2018 Designed with over 50 years of expedition heritage, National Geographic Venture is able to explore the same remote locations as National Geographic have sought out for decades while setting a new standard in comfort and style. She will follow National Geographic Quest in featuring step-out balconies (available in 22 of the 50 spacious cabins), plus 6 sets of connecting cabins for families and groups; a Sun Deck bar, and a designated mudroom for expedition gear. Comfortably accommodating 100 guests, Venture has a shallow draft depth, allowing us to navigate the same inner reaches and provide the same intimate experiences of the charismatic regions we explore. Her twin expedition craft landing platforms allow you to get on and off the ship quickly to take advantage of wildlife sightings and to ensure we maximize our time off the ship exploring. Designed with decades of expedition experience in the region, the purpose-built vessel also features open decks, generous windows, and specialty tools for exploration--the ideal platform for sailing into the fast-moving channels and shallow coves of Alaska and the Pacific Northwest and for exploring the tropical waterways of Central America. Remotely Operated Vehicle Capable of reaching 1,000 feet, far beyond the range of

any Scuba diver, the ROV allows you to literally view parts of the undersea that are as unexplored as the moon. Chances are you, like many of our guests, will be struck by how surprisingly colorful undersea life is in these unlikely places. And this glimpse may fundamentally change how you view the ocean. Kayaks National Geographic Venture is equipped with 24 two-person kayaks--a fleet large enough to ensure everyone who wants to can paddle at every opportunity. Consequently, prior kayaking experience isn't necessary--many of our guests have their first kayaking experience in extraordinary locations. Our custom-designed floating platform lets us deploy kayaks from the ship, or any location we want--including far from shore. Kayakers are usually free to explore where they want within boundaries set by the undersea specialist and officer of the watch. Underwater camera Our undersea specialist will dive often during your expedition, even in Alaska, with cold-water gear, to shoot high-definition, Cousteau-like footage of the deep. Colorful nudibranchs, swimming, plant-like crinoids, and mysterious fish with antifreeze blood that thrive in the frigid sea will give you an entirely new appreciation of the marine environment. Video microscope Naturalists will use the video microscope to help explain all elements of the environment, including tiny organisms that are the building block of the marine ecosystem. Spellbinding live views of krill at 80x magnification fills the high-definition screens in the lounge with vivid detail, and fills every onlooker with a sense of wonder at the importance of otherwise unobservable creatures. Hydrophone This underwater microphone is deployed to listen to the vocalizations of marine mammals. Real time transmissions

of their eerie, haunting sounds can be broadcast through the ship or recorded for later playback. Few experiences in nature are as captivating as watching humpback whales feed close to the ship as their vocalizations play through the ship's PA system. Electronic charts An electronic chart showing the ship's location, course, and speed is almost always on display in the lounge. Open bridge You'll find our captains are engaged, knowledgeable members of your expedition who are eager to share their passion with you. Venture's open bridge features comfortable spaces to sit, enjoy the view, drink your morning coffee, or simply chat with the officers. Snorkeling gear & wetsuits On warm weather itineraries where there will be snorkeling, you'll select a mask, snorkel, fins, and wetsuit that remain yours for the duration of the expedition. There's no need to pack and tote your own gear, although guests who prefer to are welcome to bring

their own.
