

CHRISTMAS IN ANTARCTICA 2020 (GREG MORTIMER)

Have a 'Happy Penguin Christmas' when Antarctica is at its liveliest. If you feel the festive season is a great time to get away from it all, join our special celebratory voyage. Combine the best of the Antarctic Peninsula and South Georgia on one incredible voyage. Antarctica offers spectacular frozen landscapes, lively penguin colonies, feeding whales and unsurpassed adventure activities. Cross the majestic Scotia Sea to visit the world's largest king penguin colonies and for some, follow Shackleton's epic walk across South Georgia on foot.

ITINERARY

Day 1 – Arrive Ushuaia

Arrive in Ushuaia, where you will be met by a representative of Aurora Expeditions and transferred to your downtown hotel (preferred flights only).

Day 2 – Embark the Greg Mortimer in Ushuaia

The Small Cruise Ship Collection

www.small-cruise-ships.com

small-cruise-ships.com

info@small-cruise-ships.com

This morning, enjoy a leisurely breakfast at the hotel before exploring Ushuaia on a half-day city tour. Ushuaia, capital city of the province of Tierra del Fuego, is located on the shores of the Beagle Channel and it is surrounded by the Martial Range, which offers a unique landscape as a result of the combination of mountains, sea, glaciers and forest. The city tour will visit The Mission, Brown and Solier neighbourhoods, where you can see old houses belonging to the first families in Tierra del Fuego, such as the Beban, the Pastoriza, and the Ramos. Head 11 kilometres (6.8 miles) out of town to Martial Glacier. The ride in the chair lift to the trails leading up to the glacier provides wonderful regional views and of Ushuaia town, the Beagle Channel and its islands. Afterwards, continue to the End of the World Museum with exhibitions explaining the history of Tierra del Fuego. Transfer to the pier where our expedition team will warmly welcome you on board the Greg Mortimer at approximately 4.00 pm (final embarkation time will be provided in your final documentation). As the Greg Mortimer pulls away from port, we'll gather on the deck to commence our adventure with spectacular views over Ushuaia and Tierra del Fuego. You'll have time to settle into your cabin before our important briefings.

Day 3 – At Sea

As we commence our trip across the South Atlantic Ocean towards the Falklands~Malvinas, we make the most of our time getting comfortable with the motions of the sea. Our expedition team prepare you for our first landing with important wildlife guidelines and biosecurity procedures, and start our lecture program to help you learn more about the region's history, wildlife and environment. Our wildlife experiences begin as we enjoy watching and photographing the many seabirds, including

majestic albatrosses and giant petrels following in our wake. They rise and fall skilfully, using air currents created by the ship to gain momentum.

Day 4 – Falklands~Malvinas

Located 477 kilometres/296 miles east of southern Argentina, the Falklands~Malvinas are a unique mix of wildlife hotspot and inhabited outpost. An archipelago of over 700 islands, but consisting of two main islands, East and West, only seven of the islands are inhabited. The cold nutrient-rich waters surrounding the islands makes them a prime location for marine life including seabirds and seals. Our time in the Falkland~Malvinas includes a short walk in historic Stanley town, and Sealion Island located in East Falkland's south, where you can get insight into the unique experience of Sealion Island Nature Reserve. You will discover how the raw beauty and solitude of the island makes it a haven for wildlife and visitors alike. In 2009, Sealion Island was officially declared a National Nature Reserve, with no introduced predators living on the island. Tussac grass covers much of the island providing an ideal habitat for elephant seals and sea lions that can be found on many of the island's spectacular beaches. A plethora of birds such as thrushes, finches, tussac birds and Magellanic penguins also inhabit the tussac. Pods of orcas, Peale's dolphins and leopard seals are regularly seen in the waters around the island. The island's southern giant petrels, with a wingspan of two metres, act as a welcoming party to ships as they approach Sealion Island. Rockhopper, gentoo and Magellanic penguins come to Sealion Island to breed. Macaroni, king penguins and Striated and Crested Caracaras are also commonly seen on the island.

Days 5-7 – At Sea

The Small Cruise Ship Collection

www.small-cruise-ships.com

small-cruise-ships.com

info@small-cruise-ships.com

Between the Falklands~Malvinas and South Georgia, you will be entranced by the ceaseless flight of the many seabirds that follow our wake, skilfully using the air currents created by the ship to gain momentum. On this leg, we are usually travelling into the prevailing weather so it is difficult to estimate our precise arrival time in South Georgia. Our lecture program will continue highlighting all of the incredible sights we have witnessed over the past few days. You will have ample time to enjoy observing the sea birds, whale-watching from the observation areas, or simply relaxing with a book. If time and weather conditions permit, we could pass close to Shag Rocks, a fascinating group of jagged rocky islets protruding from the sea, in the proximity of South Georgia.

Days 8-12 - South Georgia

Over the next few days, marvel at South Georgia's incredible scenes such as enormous and bustling king penguin colonies, fur seals jostling for space on the beach, jaw-dropping mountain landscapes and learn of Shackleton's epic rescue journey. On Zodiac-cruises, discover bays filled with raucous and playful fur seals, and land on pebble beaches to meet curious penguins. Challenge yourself on hikes and enjoy dazzling pristine landscapes seen by few. South Georgia is a place where you can truly feel like you've really escaped from your normal daily life. South Georgia is one of the world's most amazing natural environments. Just a speck in the vastness of the South Atlantic Ocean, and lying wholly within the Antarctic Convergence, South Georgia and the South Sandwich Islands are a life-sustaining haven to some of the world's largest congregations of wildlife. The surrounding sea is one of the most productive areas on Earth and supports the life of millions of seals, whales, penguins and other seabirds. A mountain range forms the spine of this

long, narrow island. Between the mountains, shattered glaciers carve their way through tussock grass to the deeply indented coastline - a landscape that is synonymous with the epic expedition of survival by Shackleton, Worsley, and Crean. Abandoned rusting whaling stations and remnants of explorers reflect a time of long ago, while summer workers conduct scientific and regeneration projects. As we explore South Georgia, we will have the opportunity to reflect on Shackleton's epic journey. If conditions permit, we plan to follow in Shackleton, Worsley, and Crean's footsteps and complete the final leg of their walk from Fortuna Bay to Stromness. On this expedition, we will make a special stop at King Haakon Bay to drop off our Mountaineers to start their 3-day crossing of South Georgia. A sample of some of the places where we may land in South Georgia include: Grytviken - originally a Norwegian sealing and whaling station, it was finally closed in 1965. Sir Ernest Shackleton's body was laid to rest at Grytviken. St Andrews Bay - the long black sandy beach fronts a broad valley that stretches well back from the sea. This valley shelters the largest king penguin colony on South Georgia. Godthul - imagine indented bays lined with bleached whale bones, teeming with fur seals and penguins just 'hanging about'. A careful descent leads us to a magnificent Macaroni penguin rookery. Salisbury Plains - Salisbury Plain has one of the largest king penguin colonies on South Georgia. With about 100,000 pairs, the shore and beach can be completely crammed with penguins. Along the beach you will also find fur and elephant seals in the mix. Fortuna Bay & Stromness - Fortuna Bay is surrounded by high mountains with glaciers pushing down from the high country to terminate in the open valley that is home to a small king penguin colony. This is where Shackleton, Worsley, and Crean descended from the treacherous glaciers of the interior on their way to Stromness

The Small Cruise Ship Collection

info@small-cruise-ships.com | small-cruise-ships.com

whaling station.

Days 13-14 - At Sea

Attend informative lectures to learn about Antarctica as we sail across the Scotia Sea towards the white continent. Treat yourself to a massage in the wellness centre or stay active in the gym; the choice is yours on how you want to enjoy days at sea.

Days 15-19 - Antarctic Peninsula

Over the next few days a host of choices are open to us, and depending on ice and weather conditions, the western side of the Antarctic Peninsula is ours to explore. Our experienced expedition team, who have made countless journeys to this area, will use their expertise to design our voyage from day to day. This allows us to make best use of the prevailing weather, ice conditions and wildlife opportunities. Because we are so far south, we will experience approximately 18-20 hours of daylight and the days can be as busy as you wish. We will generally try for two landings or Zodiac excursions each day; cruising along spectacular ice cliffs; following whales that are feeding near the surface; and landing on the continent and its off-shore islands to visit penguin rookeries, seal haul outs, historic huts, and a few of our other favourite spots along the peninsula. There will be plenty of time for sleep when you get home! There are many exciting places we can choose to visit and our itinerary is deliberately flexible to allow us to pick the best spots on the day based on ice and weather conditions. A sample of some of the types of places where we may cruise through, land, hike, photograph or view spectacular wildlife include: Beautiful protected bays around the Antarctic Peninsula surrounded by magnificent peaks and spectacular glaciers, areas that are havens for whales as we keep our eyes open for humpbacks, orcas, minke, and crabeater seals, as we explore bays in

Zodiacs. Wildlife-rich islands where glaciers and mountains dominate the vista and we can see large chinstrap penguin colonies tucked in between basaltic turrets coloured by yellow and orange lichens, and where often fur seals and elephant seals are hauled out on the pebble beaches. Harbours home to gentoo penguins, and that regularly host Weddell seals. The scenery is dramatic towering peaks and calving glaciers surround the harbour. The thundering crack of the glaciers as they calve is sure to stop you in your tracks. Lemaire Channel - If ice conditions allow, standing on the observation deck of the Greg Mortimer quietly as the ship sails along the narrow Lemaire Channel could certainly be one of the highlights of our voyage. Cliffs tower 700 metres / 2,296 feet straight out of the ocean on either side of the ship. The water can sometimes be so still that perfect reflections are mirrored on the surface and it is clear to see why this Channel is often called "Kodak Alley". Gigantic icebergs may clog the channel, creating navigational challenges for our Captain and crew; occasionally they may even obstruct our passage.

Day 20 - At Sea

You may choose to spend the sea days returning to Ushuaia editing your photos, enjoying the onboard facilities, or listening to an informative lecture.

Day 21 - Disembark Ushuaia

During the early morning, we sail along the Beagle Channel, before quietly slipping into dock in Ushuaia, where we begin disembarking at around 8.00 am. Farewell your expedition team and fellow travellers as we all continue our onward journeys, hopefully with a newfound sense of the immense power of nature. A transfer to either downtown Ushuaia or to the airport is included in the cost of the voyage.

Please Note:

In true expedition style we encourage exploration and adventure, offering flexibility in challenging environments in a way that puts you among the action to see and do as much as possible. This itinerary is only a guide and subject to change due to ice and weather conditions.

YOUR SHIP: GREG MORTIMER

YOUR SHIP:

Greg Mortimer

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

Capable of negotiating the strongest winds and waves, the Greg Mortimer is built to world-class polar standards - designed in close consultation with our expedition specialists, taking advantage of our more than 25 years of experience. The Greg Mortimer redefines expedition cruising for the future, with just 132 passengers on board in the polar regions. Not only is the ship bigger to contend with adverse weather conditions, its added creature comforts make for a more enjoyable journey out on the open ocean. The Greg Mortimer remains true to our ethos and focus on multiple landings, flexible itineraries and family atmosphere - just with an improved home base! As a modern and custom-designed ship, the Greg Mortimer is at the cutting edge of nautical technology. Robust, powerful and built with our guests in mind, this ship marks a significant investment in our fleet's capabilities. From the European Arctic to the depths of Antarctica, and other far-flung destinations in-between, the Greg Mortimer will make your journey a breeze! Greg Mortimer X-BOWX-BOW™ Our expeditions face some of the worst Mother Nature can throw at us. However, this won't be problem on the Greg Mortimer with the introduction of the patented X-BOW™, created by Norwegian ship designer ULSTEIN. As one of the

leaders in marine engineering, ULSTEIN's X-BOW™ is an inverted bow concept that's been built on over 100 vessels in the shipping industry. Excitingly, we are the first expedition cruise operator to utilise this technology for the challenging open ocean waves! Hydraulic viewing platforms Although there is no doubt that you'll love the aesthetics of the Greg Mortimer, we are all here to admire the spectacular landscape and spot the elusive wildlife in their natural habitat. To ensure you get the best views possible, the new ship features unique viewing platforms, custom-built for the Greg Mortimer. Accessed from Deck 5, the two platforms fold out hydraulically for unobstructed views of passing marine life and seabirds - make sure your camera is locked and loaded! Zodiac launching platform Zodiacs are a vital part of getting up close and personal on your adventure - sneaking into areas that the Greg Mortimer can't reach. On this new ship, there are specially designed launching platforms that enables us to load Zodiacs easily and quickly, allowing you to spend more time exploring on the two to three daily landings. There are 15 Zodiacs that are boarded from either side of Deck 3 (sea level), perfect for when there is a group of fluffy cute penguin chicks that we need a photo of! Activity Platform Regardless of your destination, we offer a number of additional activities to allow you to see more of the environment. From kayaking and diving to climbing and ski touring, it's these optional activities that often leave the biggest impression on your trip as a whole. Onboard the Greg Mortimer, there is a spacious prep and loading platform for these activities and more - designed in consultation with our expert activity guides. Environmentally friendly Climate change and carbon

emissions continue to be major issues that everyone needs to be aware of and actively managing. This includes reduced emissions into the air and sea, lower energy consumption, high fuel efficiency, reduced light pollution for minimal wildlife disruption and lower on-board plastic use. It's vital to also mention the state-of-the-art virtual anchoring technology of the X-BOW™, which means the ship can float anchorless while launching Zodiacs, kayaks etc, without disturbing delicate sea floor areas. Safety features This starts with the return-to-port equipment - not compulsory on a ship of this size - which duplicates the propulsion system. This enables the ship to maintain operating systems and comfort in the event of engine failure. Furthermore, the Greg Mortimer is Polar Code 6 compliant, holds BV class and is fully compliant with the latest SOLAS requirements. It's also built with a Rolls Royce stabiliser system. If there's an incident or accident during your adventure, the ship has an on-board, fully-stocked medical centre - where our trained medical team can provide necessary treatment in a timely fashion. Safety continues to be an issue that our team takes very serious and the Greg Mortimer allows us to create an environment where you can concentrate on the brilliant landscape and wildlife, without worrying about your wellbeing. Ship Life Greg Mortimer is designed to serve your every need. It's your bedroom, bathroom, lounge, dining room and even your observatory. Make yourself at home, the Greg Mortimer is yours to enjoy! Observation Points Let's face it - you don't want windowless rooms when travelling around some of the most beautiful locations around the world. This is why the Greg Mortimer is designed with plenty of dedicated observation spaces - ideal for keen bird spotters, wildlife watchers and those wanting to watch the scenery go past. From the indoor 180-degree lounge and outdoor 360-degree open deck, both

on deck 8, to the 270-degree open sundeck on level 7, there are plenty of observation points to share around the ship! If these are full, then you can take up a spot on one of the two hydraulic viewing platforms on deck 5. Aurora Expeditions also has an open bridge policy, which means at any point you can come up to the bridge and check out what the captain and officers are up to. From watching navigational practices to observing mapping techniques, you can get a firsthand look at the inner workings of the Greg Mortimer. Shore excursions Although the ship is fun, the real enjoyment comes from the many shore excursions that are available. Depending on the weather and itinerary, it's possible to take two to three landings daily, taking a look at everything from rock formations and ancient ruins to cute groups of penguins. We know time is of the essence in these wild locations, so the Greg Mortimer has been designed with 15 Zodiacs, which means you can maximise your time on shore. From four dedicated sea level launching platforms, transfers are quicker, safer and enable you to get closer to the action for a longer period of time. Just remember to charge your camera before you step onto the Zodiac! Activity options From kayaking and skiing to diving and climbing, these are one-in-a-lifetime opportunities that you need to take advantage of. Aboard the Greg Mortimer there is a specially designed launching platform for all activities, a concept overseen by our activity experts. This area also includes individual lockers in the expansive mudroom and rapid drying areas for wetsuits so you can quickly get warm after exploring in the elements! Dining From the moment you step onto the Greg Mortimer, we aim to give you the best hospitality service possible. Starting with the official Captain's welcome, as our guests, you're welcome to 24 hours complimentary coffee, tea and snack facilities in addition to the range of different menu

options and courses for each meal. Meals are served in large dining room/restaurant with family style dining, perfect to swap stories with your new expedition family. Enjoy the range of house wine, beers and soft drinks included with dinner after a long day in the wild, preparing yourself for another exciting day to follow. On the last day of your trip, the team on the Greg Mortimer put on a special farewell four-course dinner and cocktails - a perfect way to reflect on your time on the ship and consolidate lifelong friendships with the people you've met on-board. On-board entertainment When you're relaxing during a sea day or you have a little downtime on the ship between excursions, what is there to do onboard the Greg Mortimer? Plenty! On all our expeditions, there are experts who lead presentations in the spacious lecture room so you can understand the region a little better. These often include topics as broad as history and culture to biology and climate change, these presentations aim to educate and entertain. If you're keen to just watch the surroundings and keep your eyes peeled for wildlife, you have access to two bars/lounges where the stunning floor to ceiling windows offer a special perspective on the landscape. The Greg Mortimer is also decked out with other facilities for your enjoyment. There is a library on Deck 5 with books and maps and a Wellness Centre complete with gym equipment, sauna and spa. Feeling a little sore after walking around all day? Treat yourself to a massage at the Wellness Centre and feels the aches disappear! Keen photographers and artists will revel in the multimedia room

on Deck 5.
