

COSTA RICA AND THE PANAMA CANAL CRUISE - FROM SAN JOSE TO CARTAGENA

Immerse yourself in the remarkable coastlines of Costa Rica and Panama. Costa Rica (the 'rich coast') is one of the most biodiverse regions on earth. Discover tropical rainforests teeming with outstanding variety of wildlife, brilliant birds and flamboyant flora. In Panama, discover pristine coral reefs, meet the indigenous people of the Embera Mogue community, and learn the remarkable history of the Panama Canal on a guaranteed daylight crossing from the Pacific Ocean to the Caribbean Sea. Concluding in Cartagena de Indias, Colombia, revel in the vibrant Afro-Caribbean culture and the fascinating and colourful historic centre--a UNESCO World-heritage site.

ITINERARY

Day 1: San Jose

Having made your way to San Jose, you will be met by a representative of Aurora Expeditions and transferred to our group hotel. Upon arrival, you will be provided with Aurora Expeditions cabin tags for your luggage. Please clearly label the tags with your name and ship cabin number. Enjoy free time, and in the evening, dine at your leisure (dinner not included). Accommodation: DoubleTree by Hilton Hotel Cariari (or similar)

The Small Cruise Ship Collection

www.small-cruise-ships.com

small-cruise-ships.com

info@small-cruise-ships.com

Day 2: Embarkation

This morning, your luggage will be collected from the hotel and transferred directly to the port for sanitisation, clearance and delivered to your cabin ahead of your arrival on board. There is time to settle into your cabin before attending important safety briefings. Enjoy the thrill of departure as we 'throw the lines' and set sail on our adventure.

Day 3: Curú National Wildlife Refuge

Curu National Wildlife Refuge is a privately-owned nature reserve offering visitors outstanding eco-tourism experiences. The refuge is the first privately-owned refuge in Costa Rica, encompassing more than 3,700 acres of tropical forests, mangroves, and well-marked paths. 17 hiking trails wind through the varied terrain within the reserve, where you may see white-tail deer, armadillos and iguanas. Various monkey species are prolific within refuge including native capuchin, spider, and howler monkeys. Located on the southern Nicoya Peninsula of north-western Costa Rica, the refuge is brimming with wildlife and hosts one of the most beautiful beaches and protected bays on the Nicoya Peninsula, a great place to enjoy water activities.

Day 4: Manuel Antonio National Park

Boasting over 100 species of mammals, 184 species of birds and an impressive variety flora, Manuel Antonio National Park understandably attracts wildlife enthusiasts from all over the world. Costa Rica's star attractions - two and three toed sloths, as well as white-faced monkeys, toucans, agoutis, armadillos and coatis are a few of the exciting animals that you may encounter within the park. We explore the park in the cool, early hours of the morning before returning to the vessel for lunch. In the afternoon, you have the option to explore Quepos town or

enjoy some water activities.

Day 5: Drake Bay & Corcovado National Park

The untamed Osa Peninsula is considered by National Geographic to be 'one of the most biologically intense places on earth'. Considered to be the crown jewel in the park system of Costa Rica, Corcovado National Park is the country's largest and one of the most remote parks in Costa Rica. It is home to the largest and tropical primary lowland rainforest in the world and provides habitat for a plethora of endangered plant and animal species including the scarlet macaw, various frogs, and the tapir - the largest terrestrial mammal in Central and South America. We enjoy a hike along well-marked trails within the national park to not only search for wildlife but also to experience the incredible wet tropical rainforests containing tall trees measuring over 60 metres (197 feet), lianas, epiphytes, palms, gingers and orchids.

Day 6: Golfo Dulce

Golfo Dulce, or Sweet Gulf, is a large bay that hugs pristine beaches, rivers and tall evergreen forests - a protected area known as the Golfo Dulce Forest Reserve. As one of the wettest places on Earth with over 5,000 millimetres (200 inches) of rainfall per year, the Golfo Dulce Forest Reserve features some of the world's tallest trees. The warm tropical waters in the gulf are a great place to enjoy aquatic activities, where spinner dolphins are often seen frolicking in the bay. There are ancient coral reefs to explore, where you can see enormous coral gardens and the creatures that inhabit them. On land, there are more pristine rainforest trails for you to explore, where you can marvel at the extraordinary flora and fauna that contributes to Costa Rica's biodiversity. By Zodiac, we shuttle ashore to Saladero Ecolodge and explore the gardens and walking trails

small-cruise-ships.com

info@small-cruise-ships.com

filled with flowering plants. Keep a watch for birds including toucans, scarlet macaw, caracara and woodpeckers. In Golfo Dulce we exit Costa Rica and continue our journey as we sail to Panama.

Day 7-8: Coiba National Park, Panama

We continue to Coiba Island, a National Park and a UNESCO World Heritage site, located off the southwest coast of Panama. The national park includes the main island of Coiba and 38 smaller islands in the surrounding marine areas within the Gulf of Chiriqui. Protected from the cold winds and the effects of El Niño, the Pacific tropical forest of Coiba Island features exceptionally high levels of endemic mammals, birds and plants. It is the last refuge for a number of threatened animals including the crested eagle. On Coiba Island, we spend the morning in the area of Granito de Oro islet, a unique place that allows snorkellers to encounter a diversity and volume of marine life that is usually reserved for scuba divers. This is one of the world's most sought-after diving destinations. The local ranger will provide guidance on the optimal places where we can enjoy water activities. The following morning, we plan to land at Punta Clara, which served as a penal colony from 1919 to 1996, where Panama's most notorious criminals and political prisoners were incarcerated. At the peak of its operations, the prison housed up to approximately 3,000 inmates in about 30 camps spread around the islands. You can visit the dilapidated penitentiary buildings or walk along the beach looking for scarlet macaws, yellow caracara and various seabirds. Back on board, enjoy lunch as we set towards the Pearl Islands.

Day 9: Bartolome Island, Pearl Islands

The Pearl Islands of Panama is an archipelago located in the North Pacific Ocean in the Gulf of Panama, covering around 250

small islands. The Spanish Conquistadors discovered the islands in 1503 and gave the Islands its name due to the great amounts of pearls found on them. The Pearl Islands were originally named by the Spanish explorer Vasco Nuñez de Balboa due to the bountiful pearls that were harvested off the islands' shores. The Pearl Islands are most famous for their spectacular and tranquil white sand beaches, untouched forests, and colourful coral reefs offshore - ideal for diving, snorkelling and kayaking. We plan to visit Bartolome Island to enjoy some paddle boarding, kayaking and snorkelling in the warm, turquoise waters.

Day 10 - 11: Panama City

Three million years ago, the Isthmus of Panama emerged from the sea and changed the world forever. It divided an ocean and joined two continents together, triggering one of the most important natural evolution events in the history of the world. Today, this narrow land bridge in Central America is home to more species of birds and trees than the whole of North America. Panama is of course world-famous for its 77 km (48 mi) canal that connects the Pacific Ocean with the Atlantic Ocean. Panama's history has been formed by a rich pre-Columbian era for more than 12,000 years. Early cultures in Panama were the Monagrillo, the Cueva and the Conte, particularly famous for their pottery, which was the first in the Americas. The first European claiming the territory of today's Panama was Rodrigo de Bastidas, coming from Colombia's Atlantic coast in 1501. In 1513 Vasco Nuñez de Balboa became the first Spaniard to see the Pacific Ocean from the top of a hill. Four days later he and his men stood at the shores of the Pacific Ocean. In 1519, Panama City was founded and became an important hub for seized goods making its way from

info@small-cruise-ships.com

Peru to Spain. We visit an Embera village, an indigenous tribe who have inhabited this region for centuries. There are about 33,000 Embera living in the Darien, Panama, and 50,000 in Colombia. On our visit to one of the Embera villages near Panama City, you will be warmly welcomed by the local villagers and enjoy a presentation to learn about their history, culture and way of life. On a guided walk through their village, you will meet more villagers who may show you inside their home, sample local snacks and learn about their medicinal plants. The Embera are renowned for their exquisite handmade jewellery and woven handicrafts, and you will have the chance to appreciate and to purchase their work. In the afternoon, we stop at the Miraflores Visitor Centre overlooking the Miraflores lock of the Panama Canal. Four exhibition halls portray the canal's history and biodiversity, while three terraces and observation decks are ideal places for observing the canal's operation and the passage of ships through the locks. The following day, we visit Gatun Lake, a large artificial lake with a unique ecosystem that forms a major part of the Panama Canal, carrying ships for 33 km (20 miles) on their transit across the Isthmus of Panama. At the time it was created, Gatun Lake was the largest artificial lake in the world. The vegetation at Gatun Lake offers ideal habitats for a large number of bird species. The excursion starts with boat trip that heads north on the canal for 25 minutes where we may get close to some of the larger ships that transit the canal daily. Enjoy a leisurely cruise along the forested banks of Gatun Lake looking for wildlife such as capuchin monkeys, howler monkeys, three-toed sloth, various kinds of toucans and other bird life. This is a place to observe the raw regenerative power of the forest as it struggles to claim what was once wild. Enjoy lunch at a resort located in the shores of the Gatun Lake. Afterwards, head to Casco Viejo, Panama's historic old quarter. Inscribed on

the list of World Heritage Sites in 1997, Casco Viejo is a compact treasure trove of 16th and 17th century colonial architecture. The oldest continuously occupied European city in the Americas on the Pacific coast, also known as Panama Viejo, was founded in 1519. The excursion includes visits to two exceptional sites as well as a guided walk around the historic quarter and the cobblestone streets for a leisurely look at many historic landmarks including: Plaza Herrera, San Jose Church, Plaza Francia, Plaza Bolivar with the San Francisco de Asis Church, Plaza Mayor (where the Metropolitan Cathedral is located). After the tour, you have the option of exploring Casco Viejo at your own pace or return to the ship. A shuttle service will be available to transfer you to the ship.

Day 12: Daylight Crossing of the Panama Canal

Crossing the Panama Canal will surely be a highlight for many travellers. Each year, over a million people visit the canal to witness this engineering marvel at work. Starting in the Pacific Ocean, you will be able to admire the Bay of Panama and Panama City's splendid skyline before passing under the 'Bridge of the Americas'. The vessel will then transit through the first set of locks, the Miraflores Locks, where it will be lifted 16 metres (52 foot) in two distinct steps. Next, your ship will enter Miraflores Lake, which is a small artificial body of fresh water that separates Pedro Miguel Locks from Miraflores Locks. The vessel will transit through Pedro Miguel Locks, which is one of the two sets of locks on the Pacific side, and here the vessel is lifted 9 metres (29 foot) in one step. After exiting Pedro Miguel locks, your boat will travel through the Gaillard Cut, where the Chagres River flows into the canal. The Gaillard Cut (also known as Culebra Cut because its curves resemble a snake) is one of the main points of interest for visitors because it was carved

The Small Cruise Ship Collection

www.small-cruise-ships.com

01432 507 280 (within UK)

info@small-cruise-ships.com | small-cruise-ships.com

through the Continental Divide and this section of the canal is full of history and geological value. As you transit the cut you will see dredging occurring to control the sediments entering the canal because of the terrain's susceptibility to landslides. Sail through Gatun Lake, which was formed by erecting the Gatun Dam across the Chagres River, and during your transit through the lake, you will pass the Smithsonian Research Station at Barro Colorado. The last of the three locks is the Gatun Locks, the only set of locks in the Atlantic sector of the canal. At Gatun Locks, the vessel will be lowered a total of 26 metres (85 foot) in three distinct chambers. The complete crossing from the Pacific to the Atlantic Ocean takes approximately 10 hours, a journey that once took almost two weeks to complete, when vessels were forced to sail around the notoriously rough seas around Cape Horn at the bottom of South America to reach the Pacific coast.

Day 13: At Sea

As we sail to Cartagena de Indias, Colombia, on the only sea day of the voyage, enjoy a few final presentations from our team of experts, edit photos, treat yourself to a massage or stay active in the gym.

Day 14: Cartagena de Indias

Disembark in Cartagena de Indias, inscribed by UNESCO as a site of Outstanding Universal Heritage. The city's rich history, diverse culture and energy captivates visitors with its vibrancy, Afro-Caribbean character, indigenous influences and some of the best-preserved colonial architecture in all of South America. Founded in 1533 by Pedro de Heredia, Cartagena was formerly one of the gateways to the Caribbean for the Spanish. It was here they would store the riches plundered from South America before they were transported back to the old world. It is not

surprising, therefore, that the city drew the attention of buccaneers and pirates, who attempted on many occasions, to seize the city. Most notable was the attack by Francis Drake, who in 1586, "mercifully" agreed not to destroy the city in return for 10 million pesos. It was after the attack by Drake that plans were made to fortify the city and work on the defensive fort walls began. These walls still stand today and mark the boundary between the old and new parts of the city. The walls and fort, now a UNESCO World Heritage Site, took a total of 200 years to build and complete, and the Spanish finished them just 25 years before Colombia gained Independence. After disembarkation, enjoy a guided introductory tour of Cartagena's old town. Your local guide will tell stories of the myths and legends of Cartagena from ancient times right up to the present. From the Plaza San Pedro Claver with its stunning Church to the Plaza Bolivar with its shady areas, where you can watch the world go by. During the walk you will visit the Inquisition Palace, built in the 17th century and considered to be one of the most elegant and characteristic colonial constructions in its time. A short walk away and your final stop is a visit to San Pedro Claver Cloister, monastery and museum built in homage to San Pedro - the protector of slaves. The cloister where Pedro Claver lived and died has become a special place of silence, and reflection - a shrine to his life's work. Here, visitors will find examples of pre-Colombian ceramics and a museum filled with religious art. Adjoining the monastery is a baroque church designed by German and Dutch architects, where the remains of Saint Pedro Claver is enshrined. Enjoy lunch at a local restaurant before transferring to our group hotel for an overnight stay. The remainder of the day is at leisure. (Breakfast and lunch included) Accommodation: Hyatt Regency Hotel (or similar)

YOUR SHIP: GREG MORTIMER

YOUR SHIP:

Greg Mortimer

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

Capable of negotiating the strongest winds and waves, the Greg Mortimer is built to world-class polar standards - designed in close consultation with our expedition specialists, taking advantage of our more than 25 years of experience. The Greg Mortimer redefines expedition cruising for the future, with just 132 passengers on board in the polar regions. Not only is the ship bigger to contend with adverse weather conditions, its added creature comforts make for a more enjoyable journey out on the open ocean. The Greg Mortimer remains true to our ethos and focus on multiple landings, flexible itineraries and family atmosphere - just with an improved home base! As a modern and custom-designed ship, the Greg Mortimer is at the cutting edge of nautical technology. Robust, powerful and built with our guests in mind, this ship marks a significant investment in our fleet's capabilities. From the European Arctic to the depths of Antarctica, and other far-flung destinations in-between, the Greg Mortimer will make your journey a breeze! Greg Mortimer X-BOWX-BOW™ Our expeditions face some of the worst Mother Nature can throw at us. However, this won't be problem on the Greg Mortimer with the introduction of the patented X-BOW™, created by Norwegian ship designer ULSTEIN. As one of the

leaders in marine engineering, ULSTEIN's X-BOW™ is an inverted bow concept that's been built on over 100 vessels in the shipping industry. Excitingly, we are the first expedition cruise operator to utilise this technology for the challenging open ocean waves! Hydraulic viewing platforms Although there is no doubt that you'll love the aesthetics of the Greg Mortimer, we are all here to admire the spectacular landscape and spot the elusive wildlife in their natural habitat. To ensure you get the best views possible, the new ship features unique viewing platforms, custom-built for the Greg Mortimer. Accessed from Deck 5, the two platforms fold out hydraulically for unobstructed views of passing marine life and seabirds - make sure your camera is locked and loaded! Zodiac launching platform Zodiacs are a vital part of getting up close and personal on your adventure - sneaking into areas that the Greg Mortimer can't reach. On this new ship, there are specially designed launching platforms that enables us to load Zodiacs easily and quickly, allowing you to spend more time exploring on the two to three daily landings. There are 15 Zodiacs that are boarded from either side of Deck 3 (sea level), perfect for when there is a group of fluffy cute penguin chicks that we need a photo of! Activity Platform Regardless of your destination, we offer a number of additional activities to allow you to see more of the environment. From kayaking and diving to climbing and ski touring, it's these optional activities that often leave the biggest impression on your trip as a whole. Onboard the Greg Mortimer, there is a spacious prep and loading platform for these activities and more - designed in consultation with our expert activity guides. Environmentally friendly Climate change and carbon

emissions continue to be major issues that everyone needs to be aware of and actively managing. This includes reduced emissions into the air and sea, lower energy consumption, high fuel efficiency, reduced light pollution for minimal wildlife disruption and lower on-board plastic use. It's vital to also mention the state-of-the-art virtual anchoring technology of the X-BOW™, which means the ship can float anchorless while launching Zodiacs, kayaks etc, without disturbing delicate sea floor areas. Safety features This starts with the return-to-port equipment - not compulsory on a ship of this size - which duplicates the propulsion system. This enables the ship to maintain operating systems and comfort in the event of engine failure. Furthermore, the Greg Mortimer is Polar Code 6 compliant, holds BV class and is fully compliant with the latest SOLAS requirements. It's also built with a Rolls Royce stabiliser system. If there's an incident or accident during your adventure, the ship has an on-board, fully-stocked medical centre - where our trained medical team can provide necessary treatment in a timely fashion. Safety continues to be an issue that our team takes very serious and the Greg Mortimer allows us to create an environment where you can concentrate on the brilliant landscape and wildlife, without worrying about your wellbeing. Ship Life Greg Mortimer is designed to serve your every need. It's your bedroom, bathroom, lounge, dining room and even your observatory. Make yourself at home, the Greg Mortimer is yours to enjoy! Observation Points Let's face it - you don't want windowless rooms when travelling around some of the most beautiful locations around the world. This is why the Greg Mortimer is designed with plenty of dedicated observation spaces - ideal for keen bird spotters, wildlife watchers and those wanting to watch the scenery go past. From the indoor 180-degree lounge and outdoor 360-degree open deck, both

on deck 8, to the 270-degree open sundeck on level 7, there are plenty of observation points to share around the ship! If these are full, then you can take up a spot on one of the two hydraulic viewing platforms on deck 5. Aurora Expeditions also has an open bridge policy, which means at any point you can come up to the bridge and check out what the captain and officers are up to. From watching navigational practices to observing mapping techniques, you can get a firsthand look at the inner workings of the Greg Mortimer. Shore excursions Although the ship is fun, the real enjoyment comes from the many shore excursions that are available. Depending on the weather and itinerary, it's possible to take two to three landings daily, taking a look at everything from rock formations and ancient ruins to cute groups of penguins. We know time is of the essence in these wild locations, so the Greg Mortimer has been designed with 15 Zodiacs, which means you can maximise your time on shore. From four dedicated sea level launching platforms, transfers are quicker, safer and enable you to get closer to the action for a longer period of time. Just remember to charge your camera before you step onto the Zodiac! Activity options From kayaking and skiing to diving and climbing, these are one-in-a-lifetime opportunities that you need to take advantage of. Aboard the Greg Mortimer there is a specially designed launching platform for all activities, a concept overseen by our activity experts. This area also includes individual lockers in the expansive mudroom and rapid drying areas for wetsuits so you can quickly get warm after exploring in the elements! Dining From the moment you step onto the Greg Mortimer, we aim to give you the best hospitality service possible. Starting with the official Captain's welcome, as our guests, you're welcome to 24 hours complimentary coffee, tea and snack facilities in addition to the range of different menu

options and courses for each meal. Meals are served in large dining room/restaurant with family style dining, perfect to swap stories with your new expedition family. Enjoy the range of house wine, beers and soft drinks included with dinner after a long day in the wild, preparing yourself for another exciting day to follow. On the last day of your trip, the team on the Greg Mortimer put on a special farewell four-course dinner and cocktails - a perfect way to reflect on your time on the ship and consolidate lifelong friendships with the people you've met on-board. On-board entertainment When you're relaxing during a sea day or you have a little downtime on the ship between excursions, what is there to do onboard the Greg Mortimer? Plenty! On all our expeditions, there are experts who lead presentations in the spacious lecture room so you can understand the region a little better. These often include topics as broad as history and culture to biology and climate change, these presentations aim to educate and entertain. If you're keen to just watch the surroundings and keep your eyes peeled for wildlife, you have access to two bars/lounges where the stunning floor to ceiling windows offer a special perspective on the landscape. The Greg Mortimer is also decked out with other facilities for your enjoyment. There is a library on Deck 5 with books and maps and a Wellness Centre complete with gym equipment, sauna and spa. Feeling a little sore after walking around all day? Treat yourself to a massage at the Wellness Centre and feels the aches disappear! Keen photographers and artists will revel in the multimedia room

on Deck 5.
