EXPLORING PATAGONIA'S NATIONAL PARKS FROM PUERTO MONTT TO TIERRA DEL FUEGO

Experience the full sweep of Patagonia at close range, from Chiloe Island to the wilds of Tierra del Fuego to the pinnacles of Torres del Paine National Park and the legendary Beagle Channel. Venture deep into Chile's fjords. Pass incandescent icebergs and massive glaciers, and watch for elephant seals, Andean condors, guanacos, and penguins. Experience a swath of the Route of the Parks and enter the private reserve of Karukinka by special permission. Chile is 4,300 miles long and contains many different climates, so it produces the widest array on incredible food and wines to sample.

ITINERARY

DAY 1 Puerto Montt, Chile

Arrive in Puerto Montt and transfer to the Radisson Hotel Puerto Varas (or similar). In the early evening, we gather for an informal reception and a drink at the hotel.

DAY 2 Puerto Montt / Embark Ship

small-cruise-ships.com

info@small-cruise-ships.com

Enjoy a morning of exploration, and then relax and enjoy lunch before embarking our ship in the afternoon.

Meals Included: Breakfast, Lunch, Dinner

DAY 3 Castro, Chiloé Island

Spend the day exploring Chiloe's culture and natural history, including its attractive palafitos: colorful fishermen's houses precariously built on stilts along the water's edge. The town is full of little shops and a large open-air market where the Chileans show their indigenous wares such as alpaca sweaters and lapis jewelry. You may choose to visit Chiloe National Park to see its forests, wetlands, and wildlife, with a selection of longer or shorter walks. Alternatively, visit some of the welcoming small communities that dot the countryside and learn about a unique way of life. One of the unique features of the island's history and culture is its wooden churches, collectively designated a UNESCO World Heritage site. The churches and many of the houses are covered in protective shells of wooden shingles in artistic designs.

Meals Included: Breakfast, Lunch, Dinner

DAY 4 Pumalín Douglas Tompkins National Park

Pumalin's 750,000 acres in Chilean Patagonia are protected as one of the last areas where the unusual alerce forest remains. These huge trees are similar in dimension to California redwoods, with some specimens 2,000 years old. The Pumalin

Project was established in 1995 by the late American conservationist Doug Tompkins, who wanted to preserve some of the remaining virgin forest in Chile. Have a choice of walks in the park with naturalists in the forest, visit a hidden waterfall, or climb along a rushing stream and look for forest birds along the trail. In the afternoon, we head for the Golfo de Corcovado in search of marine wildlife, looking for Magellanic penguins, sooty shearwaters, dolphins, and--with luck--whales.

Meals Included: Breakfast, Lunch, Dinner

DAY 5 Aysén / Coyhaique / Andes Mountains

Today offers a choice of two interesting excursions.

You may decide to take a morning excursion to a nearby, exceptionally beautiful privately owned park, Aiken del Sur. The park has well-maintained trails, set in evergreen forest with lovely waterfalls and lakes, including a 75-foot-high cascade. Bird possibilities include ringed kingfisher, woodpeckers, and a variety of forest birds. A Patagonian lamb barbecue (with vegetarian options) and entertainment by local musicians awaits at the end of the walk.

Alternatively, take a full-day excursion to the Coyhaique National Reserve, driving up into a beautiful valley nestled in the Andes, with views of the snow-covered peaks. Entering the reserve, drive through evergreen forest full of giant rhubarb and ferns to the transition zone of deciduous Nothofagus forest. The starting point for our hike is Laguna Verde, "Green Lake." Coyhaique National Reserve is home to three Chilean woodpecker species,

The Small Cruise Ship Collection

www.small-cruise-ships.com

01432 507 280 (within UK)

info@small-cruise-ships.com | small-cruise-ships.com

passerines, diurnal and nocturnal predatory birds, and other animals such as pumas and foxes. After our hike, we'll have a picnic lunch and we'll visit the city of Coyhaique, seeing its central plaza and the artisans' stalls, with excellent handicrafts. We'll then return to Puerto Chacabuco and National Geographic Resolution.

Meals Included: Breakfast, Lunch, Dinner

[DAYS 6-10 Inland Passage / Chilean Fjords](#)

This huge region of incredible scenery provides days of adventure for us. A vast area of snowcapped mountains, gigantic glaciers, thousands of islands covered with forests and other vegetation, lakes, soaring granite walls, and waterfalls, the archipelago is untouched by humans except for a few fishing villages which perch at "the end of the world." With a National Geographic Photography Expert and a certified photo instructor by your side, you'll have boundless photo options.

One of the many highlights is the Pio XI Glacier, the longest glacier in the southern hemisphere outside of Antarctica, running some 60 miles from the Patagonia icefield to the fjord where it noisily calves off gigantic ice masses, at a rate of one every several minutes. It is 2 miles wide and rises nearly 200 feet above sea level. We explore by Zodiac. These days offer us multiple opportunities to hike, and to use our Zodiacs, kayaks and undersea technology to explore the beautiful protected waters. En route to Puerto Natales, we transit the Kirke Narrows, a dogleg between unforgiving rock bluffs.

Meals Included: Breakfast, Lunch, Dinner

[DAYS 11-13 Puerto Natales / Torres del Paine National Park / White Narrows](#)

From Puerto Natales, drive to monumental Torres del Paine National Park, a UNESCO Biosphere. The landscape is big, wide, and sprawling, with razor-backed ridges, Andean condors, flamingos, and rheas. It's hard to imagine that the park could top the drive, but the Torres del Paine are an amazing sight: jagged granite mountains topped with a thick layer of dark slate. Discover one of the most spectacular and wildlife-rich areas in the Americas, covering 450,000 acres of glaciers, forests and grasslands, rivers, and colorful lagoons. Chileans themselves dream of visiting this magnificent park. You'll be able to choose whether to hike or drive to some of the most scenic places in this great setting.

Meals Included: Breakfast, Lunch, Dinner

[DAY 14 Tierra del Fuego: Karukinka Natural Park](#)

Tierra del Fuego is one of Patagonia's crown jewels. Established in 2004 through a gift from Goldman Sachs, Karukinka is one of the largest donations ever made for conservation. We're thrilled to have special permission from the Wildlife Conservation Society to visit this private reserve, which spans 1,160 square miles and harbors endangered culpeo fox, Andean condors, and many other kinds of wildlife. Explore Jackson Bay, backed by a skyline of rugged mountains, and look for wildlife including black-browed albatross that nest on one of the nearby small islands.

Meals Included: Breakfast, Lunch, Dinner

DAYS 15-16 Chilean Fjords / Beagle Channel

Sail the Beagle Channel, named after HMS Beagle. The ship, commanded by Captain FitzRoy, surveyed the region between 1826 and 1830 and returned in 1833 with Charles Darwin on board. We'll explore more stunning wilderness as we see the fjords and glaciers of the region by Zodiac, kayak, and on foot. A vast area of soaring, snowcapped mountains, gigantic glaciers, thousands of verdant islands, serene lakes, and waterfalls--the archipelago is scarcely touched by man. Take Zodiacs out to explore these protected waters and rugged shores, the blue and white of ice contrasting with greens of the forest highlighted by splashes of flowering plants. Look for the Andean condors, albatrosses, grebes, petrels, fulmars, shearwaters, and many other birds that inhabit this otherworldly realm.

Meals Included: Breakfast, Lunch, Dinner

DAY 17 Ushuaia, Argentina / Disembark Ship / Santiago, Chile

Disembark today in Ushuaia, the southernmost city in the world. Have time to explore before proceeding to the airport for the charter flight to Santiago and homebound flights.

Meals Included: Breakfast

YOUR SHIP: NATIONAL GEOGRAPHIC RESOLUTION

YOUR SHIP: National Geographic Resolution

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

A next-generation expedition ship, purpose-built for polar navigation. National Geographic Resolution is a next-generation expedition ship, purpose-built for polar navigation. A twin to National Geographic Endurance, she is a fully stabilized, highly strengthened, ice-class Polar Class 5 (PC5) vessel, it is designed to navigate polar passages year-round, and safely explore uncharted waters, while providing exceptional comfort. Its patented X-BOW® is key to its design; its powerful wave-slicing action provides an extremely smooth ride in even adverse conditions, and even reduces spray on deck, for superior observation. She carries a full suite of expedition tools and offers a variety of experience-enhancing amenities. The luxury of comfort on expedition. National Geographic Resolution comfortably accommodates 126 guests in 69 outside-facing cabins. Cabins are efficiently designed, with sizes range from the 140-square-foot solo cabin to the 430-square-foot category 7 suite. Fifty-three of the 69 cabins, including all 12 of the solo cabins, will feature small balconies with floor-to-ceiling sliding doors that bring in the spectacular views and ample natural light. Comfort & convenience in every room. Every cabin has two portholes, a large window or balcony, and temperature controls.

Bathrooms are modern and stocked with botanically inspired hair products, soap, and shower gel, plus a hairdryer. Cabins are equipped with expedition command centers with tablets and USB/mobile device docking, TVs, Wi-Fi connections, and hair dryers. Dining. Food served aboard is fresh, local, and delicious, and sourced from suppliers who share our values of sustainable use whenever possible. Meals aboard are almost always served in the dining room, located aft of the lounge deck. When weather conditions allow, lighter fare may be served on the observation deck. There is no assigned seating and our dining room accommodates the entire expedition community in a single seating. During meals your expedition leader, naturalists, and any guest speakers aboard will join you. Public Areas: Two restaurants, a Chef's Table for small group dining, Observation Lounge with bar, gym, Wellness area, infinity-style outdoor hot tubs, library, main lounge with full service bar, 24-hour beverage, state-of-the-art facilities for films, slideshows and presentations, and a photo workshop area; plus, an expedition base with lockers for expedition gear, and an "open bridge" for access to our captain, officers and the art of navigation. Meals: Two restaurants, featuring local, sustainable choices and unassigned seating for flexible, inclusive dining; plus a Chef's table for intimate, small group dining. Main restaurant has 270° views, and the Observation deck restaurant features lighter, made-to-order fare. Special Features: A full-time doctor, undersea specialist, National Geographic photographer, Lindblad-National Geographic certified photo instructor and video chronicler, an internet cafe and laundry. Wellness: The vessel is staffed by our wellness specialists and features a

glass-enclosed yoga studio, gym, treatment rooms and spa relax area, and high- and low-heat saunas with ocean views. Expedition Landing Craft. Key to our operation is our fleet of expedition landing craft, which we use to land in places that would otherwise be inaccessible. With 14 of these boats and two loading stations used every time we disembark, we're able to transfer guests off the ship quickly, so you can be out on adventures, not idly waiting. The expedition landing craft we use are 19 feet long, powered by four-stroke outboard engines, and are capable of comfortably carrying 10-12 people. They are widely recognized as the safest and most versatile small boats afloat. Remotely Operated Vehicle. Capable of reaching 1,000 feet, far beyond the range of any Scuba diver, the ROV allows you to literally view parts of the undersea that are as unexplored as the moon. Chances are you, like many of our guests, will be struck by how surprisingly colorful undersea life is in these unlikely places. And this glimpse may fundamentally change how you view the ocean. Kayaks. National Geographic Resolution will be equipped with a fleet of kayaks large enough to ensure everyone who wants to can paddle at every opportunity. Consequently, prior kayaking experience isn't necessary--many of our guests have their first kayaking experience in extraordinary locations. Our custom-designed floating platform lets us deploy kayaks from the ship, or any location we want--including far from shore. Kayakers are usually free to explore where they want within boundaries set by the undersea specialist and officer of the watch. Underwater camera. Our undersea specialist will dive often during your expedition, even in polar regions, with cold-water gear, to shoot high-definition, Cousteau-like footage of the deep. Colorful nudibranchs, swimming, plant-like crinoids, and mysterious fish with antifreeze blood that thrive in the frigid sea will give you an

entirely new appreciation of the marine environment. Video microscope. Naturalists will use the video microscope to help explain all elements of the environment, including tiny organisms that are the building block of the marine ecosystem. Spellbinding live views of krill at 80x magnification fills the high-definition screens in the lounge with vivid detail, and fills every onlooker with a sense of wonder at the importance of otherwise unobservable creatures. Hydrophone. This underwater microphone is deployed to listen to the vocalizations of marine mammals. Real time transmissions of their eerie, haunting sounds can be broadcast through the ship or recorded for later playback. Few experiences in nature are as captivating as watching humpback whales feed close to the ship as their vocalizations play through the ship's PA system. Electronic charts. An electronic chart showing the ship's location, course, and speed is almost always on display in the lounge. Open bridge. You'll find our captains are engaged, knowledgeable members of your expedition who are eager to share their passion with you. National Geographic Resolution's open bridge features comfortable spaces to sit, enjoy the view, drink your morning coffee, or simply chat with the officers. Snorkeling gear & wetsuits. On warm weather itineraries where there will be snorkeling, you'll select a mask, snorkel, fins, and wetsuit that remain yours for the duration of the expedition. There's no need to pack and tote your own gear, although guests who prefer to are welcome to bring
