

## GALAPAGOS CRUISE - 4 DAYS (INFINITY)

Our complete itineraries are developed for the benefit of our passengers, who will have the opportunity to combine hiking, snorkeling, beach and kayaking; our professional guides will introduce you to the most relevant sites on each island.

### ITINERARY

**Day 1 Baltra Island Airport: Arrival and Transfer to the boat & Santa Cruz: Black Turtle Cove**

Black Turtle Cove is situated in the northern part of Santa Cruz. This inlet is surrounded by mangroves and is only accessible by dinghy. The shallow cove is a safe haven for young marine life. Black-tip and white-tip reef sharks, sea turtles, and a variety of rays are often spotted here.

**Day 2 Genovesa Island: El Barranco & Genovesa Island: Darwin Bay**

Also known as Prince Phillip's Steps, El Barranco's steep, rocky paths leads up to a high cliff-face. A marvelous view can be appreciated from here. This site is also home to palo santo vegetation as well as red-footed boobies, short-eared lava owls, Galapagos swallows, and Galapagos doves. This white sand coral beach heads a half mile trail (0.75km) that winds through

mangroves filled with land birds. Nazca boobies, red-footed boobies, and swallow-tailed gulls can be spotted here. Further down the path are tidal pools where sea lions swim playfully. At the end is a spectacular view off a cliff.

#### Day 3 Santiago Island: Sullivan Bay & Rabida Island

A coral beach landing leads you towards a lava field as far as the eye can see. Hunt and peck over the two distinguished types of lava, pahoehoe and 'a'a, for signs of plant life that have managed to emerge over the past 100 years since the most recent volcanic explosion. A truly amazing volcanic experience...up close and personal! Rabida Island (Jervis) is one of the most colorful and volcanically varied islands in the archipelago and a great snorkeling site. Its famous maroon sandy beach and stunning lookouts provide wonderful landscapes. The island is a birdwatcher's delight. Some of the rarest species are in abundance, such as nine varieties of finches, large-billed flycatchers, Galapagos hawks and brown pelicans.

#### Day 4 Santa Cruz Island: Tortoise Breeding Center & Transfer to the Baltra Airport

The Charles Darwin Research Station is home to turtles ranging from 3-inches (new hatchlings) to 4-feet long. Subspecies of turtles interact with one another and many of the older turtles are accustomed to humans stretching out their heads for a photo opportunity. The babies are kept until they are about four years old and strong enough to survive on their own.

#### Please Note:

Itineraries are unlikely to change significantly but are subject to change. Weather, wildlife breeding, safety concerns, instructions from the Galapagos National Park, specific abilities and

interests of passengers as well as operational matters may cause your guide or captain to change the time or nature of visits. Your guide and captain will always endeavor to select the best itinerary within these limits.
