

## GALAPAGOS CRUISE - 5 DAYS (INFINITY)

Our complete itineraries are developed for the benefit of our passengers, who will have the opportunity to combine hiking, snorkeling, beach and kayaking; our professional guides will introduce you to the most relevant sites on each island.

### ITINERARY

**Day 1** Baltra Island Airport: Arrival and Transfer to the boat & Santa Cruz Island: El Chato

The El Chato reserve is divided into two areas: Caseta and Chato. The trail begins at Santa Rosa (13.7 miles / 22 km) from Puerto Ayora, with the Caseta route being the more challenging. The reserve allows visitors to observe giant tortoises in the wild during the dry season and is also a good place to spot short-eared owls, Darwin's finches, yellow warblers, Galapagos rails and paint-billed crakes.

**Day 2** Santa Cruz Island: Dragon Hill & Santa Cruz Island: Bachas Beach

Situated on Santa Cruz Island, Dragon Hill is one of the newest visitor sites accessible to tourists in the Galapagos Islands. One of the lengthier Galapagos walking trails will lead visitors along a beach and up a trail to the lagoon lookout where bright

flamingos, pintail ducks, and land iguanas can be spotted. Located on the north shore of Santa Cruz, Las Bachas is a swimming beach. One of the few remnants of the U.S. World War II presence in the Galapagos, a floating pier, can be seen here. You may see flamingos, Sally Lightfoot crabs, hermit crabs, black necked stilts, and whimbrels. Sea turtles also nest off the beach.

### Day 3 Floreana Island: Post Office Bay & Floreana Island: Cormorant Point or Devil's Crown

In the 18th century whalers passing through the islands placed a wooden barrel on Floreana Island for use as an unofficial mail box. The tradition continues today as visitors leave addressed postcards in the barrel and sort through left mail to deliver at home. This site hosts a large flamingo lagoon where other birds such as common stilts and white-cheeked pintails can also be seen. The beaches on this island are distinct: The "Green Beach" named so due to its green color, which comes from a high percentage of olivine crystals in the sand, and the "Four Sand Beach" composed of white coral.

### Day 4 Española Island: Suarez Point & Española Island: Gardner Bay

This area is great for spotting blue-footed boobies, albatrosses and Nazca boobies. A beautiful site on the ocean front, the large waved albatrosses use the cliff as a launching pad. The famous attraction is the magnificent blowhole, spurting water high into the air. This site presents wonderful photograph opportunities. Gardner Bay, on the eastern side of the island, is the breeding site of nearly all of the world's 12,000 pairs of waved albatrosses. It has an ample white sandy beach with a myriad of sea lions, perfect for relaxing. Its rocky shores make this site a great place for diving and snorkeling.

### Day 5 San Cristobal Island: Interpretation Center & Transfer to the San Cristobal Airport

The Interpretation Center was opened in 1998 as a phase of the project "Interpretation and Environment Education Project." Visitors enjoy expositions on natural history, human history, and conservation. The conservation efforts represent the movement to protect the wildlife and natural environment through means of population and tourist control. The Interpretation Center has an outdoor stadium, audio-visual equipment, and meeting rooms.

#### Please Note:

Itineraries are unlikely to change significantly but are subject to change. Weather, wildlife breeding, safety concerns, instructions from the Galapagos National Park, specific abilities and interests of passengers as well as operational matters may cause your guide or captain to change the time or nature of visits. Your guide and captain will always endeavor to select the best itinerary within these limits.
