

Seaman Journey yacht. PM: SANTA CRUZ HIGHLANDS
Journeying across Santa Cruz into the highlands visitors are delighted by the island's variety of life and geology. Beginning at the coast and traveling across Santa Cruz the road departs from Puerto Ayora climbing through the agricultural lands and into the mist covered forests. Santa Cruz possesses all of the various life zones present in the archipelago. Birds will surround you across this path. Whether it's the bright red feathers of a vermillion flycatcher or one of Darwin's Finch almost every bird present in the islands can be found here. Santa Cruz offers excellent opportunities to observe the wild Galapagos Tortoises. Tracking tortoises is not the only exciting activity to be found in the highlands. There are also plenty of lava tubes, sinkholes and craters ready to be explored. After this visit they moved to the M / C Seaman Journey.

DAY 2 SATURDAY: FERNANDINA ISLAND

Off the eastern coast of Fernandina, Mangle Point can be found, a superior snorkeling site and a beautiful location for riding in a panga or zodiac through a grove of mangrove trees. A hike of about 1/2 miles is possible. While you are on your ride, you are likely to see sea lions, tortoises, pelicans, rays and birds too numerous to name them all. Punta Moreno is located on the north coast of Isabela Island between the volcano Sierra Negra and Cerro Azul volcano. The trail runs along a lava flow Pahohoe (solidified lava in the form of corrugated or an accordion) into a complex of coastal lagoons, where several species of birds which can be found around this lakes and mangroves B/L/D

DAY 3 SUNDAY: ISABELA ISLAND

Urbina Bay is located at the base of Alcedo Volcano on the west coast, between Tagus Cove and Elizabeth Bay. This area experienced a major uplift in 1954, which caused the land to rise over 16 feet. The coast expanded half a mile out, leaving marine life stranded on the new shore. This area is also a great place to snorkel. Urbina Bay is a path that starts off with a wet landing. The course is approximately 3200m, and made up of sand, pumice, lava, coral and vegetation where one can observe iguana burrows. It is an ideal place to see red and blue lobster! In Bahia Urbina you can see Darwin's finches. Its main attraction is the land iguanas, which are larger than in places like South Plaza Island and Galapagos tortoises also in the wild, sometimes even out of season they are on the bottom of the islands. A large amount of vegetation can be observed such as chamomile and Rosewood, but among all these plants, the beautiful flowers of cotton Darwin, endemic to the Galapagos Islands stand out.

DAY 4 MONDAY: FERNANDINA ISLAND

Espinoza Point is a famous place known for its large colonies of marine iguanas and as the habitat of unique species like the flightless cormorant, Galapagos penguin, Galapagos hawk, and Galapagos snake. One of the most impressive and spectacular places of the enchanted Galapagos Islands; with high cliffs and tuffstone, ash and lava formations give this area a majestic touch, is Punta Vicente Roca. It is located in the north-western coast of the island; comprises two distinct islets. This large bay has a spectacular marine life. Here, you can see seahorses, sea

turtles and the strange yet fascinating Mola-mola or sunfish. This bay is a great place to practice Panga Ride and Snorkeling. We can as well find: Penguins, Blue-footed boobies, Terns, Boobies, Sea lions. Also you can snorkel and observe sea turtles, stingrays and puffer fishes. B/L/D

DAY 5 TUESDAY: SANTIAGO ISLAND

Espumilla beach is located on the northern coast of Santiago Island in James Bay. During the last presence of the El Niño phenomenon, one of the two lagoons in this site, underwent a process of sedimentation, thus causing the disappearance of a representative colony of flamingos. The main attractions are the palosanto forest and the nesting of baby turtles. It's black beach is located on the west side of the island and is the main attraction of the island. Their volcanic tuff deposits have favored the formation of this special black sand beach. This site is called Puerto Egas, because there was an attempt to start the exploitation of salt, which failed because the price of salt in the continent was very cheap, and did not justify its exploitation in Galapagos. The project was abandoned and the infrastructure was left abandoned. B/L/D

DAY 6 WEDNESDAY: RABIDA / CHINESE HAT

Rabida Island is unique due to the red color that colours all rocks and sand. The volcanic material in this island is very porous and external factors as rain, salty water, and sea breeze have acted as an oxidizing agent. A short walk along a trail leads you to a coastal lagoon behind the beach which permits you to observe the land birds such as finches, doves, yellow warblers,

and mockingbirds. At the lagoon there is a colony of flamingos. The Chinese hat is a small islet (1 sq km) located just off the southeastern tip of Santiago Island. It is a recent volcanic cone, shaped like a Chinese hat when seen from the north. On the west you can see lava formations, formed under the sea and raised upwards, this is why coral heads are found on the lava. This is an excellent visit for interpretation of geological features such as lava tubes and lava flows. The landscape is covered by sea lions colonies, marine iguanas, and Galapagos penguins.

DAY 7 THURSDAY: SANTIAGO ISLAND / BARTOLOME ISLAND

Santiago, also called James, or San Salvador Island, is located in the west central part of the Galapagos archipelago. It is the fourth largest island in the archipelago (following Isabela, Fernandina and Santa Cruz). Along with some of the large western volcanoes of Isabela and Fernandina, Santiago is also volcanically active, with many young flows and cones to be seen, particularly along the south, west, and east coasts. These may even be seen from the summit of Darwin Volcano and from space. A number of historic eruptions have been reported over the last 2 centuries. Santiago actually consists of two coalesced volcanoes: a typical shield volcano on the northwest end and a low, linear fissure volcano on the southeast end. Bartolome Island is situated across Sullivan Bay. It has an altitude of 114 meters, from where we can observe one of the most beautiful sceneries of the Galapagos Islands such as: Volcanic cones, lunar-like craters, lava fields, and the famous Toba formed pinnacle eroded by the sea. There is very little vegetation on this island. It has two breathtaking beaches where marine turtles exist and at the base of the pinnacle, as well as a very small colony of Galapagos penguins. B/L/D

DAY 8 FRIDAY: SANTA CRUZ ISLAND

These two small beaches are found to the West of Turtle Cove. Their sand is made of decomposed coral, which makes it white and soft, making it a favorite nesting site for sea turtles. Behind one of the beaches there is a small brackish water lagoon, where it is occasionally possible to observe flamingos and other coastal birds, such as black-necked stilts and whimbrels. The other beach is longer, but it has two old barges that were abandoned during the Second World War, when the USA used Baltra Island as a strategically point to protect the Panama Channel. After the morning excursion you will be taken to the airport for your flight to the mainland. B/-/-

gorgeous sunsets over the Galapagos Islands, the sundecks are the best place to be. For the adults who might want to relax and kick back, we offer a great bar and lounge area where you are served by our bartender who will be happy to attend to all your needs and desires whilst

you relax.

The Galapagos Seaman Journey is a first class catamaran that began sailing the Galapagos Islands in January 2008. It is a Boutique Yacht Catamaran offering superior comfort, size, style, and stability. The Galapagos Seaman Journey makes it possible to enjoy several cruises in the Galapagos with different itineraries that include amazing land tours on most of the Galapagos Islands. During these Galapagos Cruises, guests encounter many endemic species like Galapagos Giant Tortoises, Penguins, Land and Marine Iguana's, Frigate Birds, Blue Footed Boobies, and much more! During one of the cruises you can enjoy the well-furnished areas offering comfort and privacy. Galapagos Seaman Journey has a maximum capacity of 16 passengers allowing both intimacy and camaraderie at the same time. There are several resting areas for those who are looking for a quiet place to relax during their Galapagos trip with family and friends in the lazy mid-afternoon sun, or likewise after a busy day of swimming, snorkeling, kayaking, or walking on one of the Galapagos Islands. To check out the gorgeous ocean views with fellow shipmates, you can spend some time on the liveaboards' spacious sundecks. Whether you feel like getting a little sun on your vacation, or want the best place to enjoy the
