

INDIAN OCEAN STEPPING STONES

Escape to warmer climes over the winter with a voyage aboard the MS Hebridean Sky in the wonderful Indian Ocean, discovering some of the most beautiful tropical islands on earth in the company of just over 100 fellow guests. Our journey includes some fascinating and exotic calls combining the stunning islands of the Seychelles including the magnificent Aldabra group of islands with the natural wonders of Madagascar. The first part of our adventure is dedicated to the Seychelles and some of the most captivating islands in the world. Amongst the highlights of our time in the Seychelles will be the Aldabra Islands, the last breeding ground of the giant tortoise and in addition to seeing some of these endearing creatures we should also encounter dolphins, turtles and whales as well as countless birds including the flightless rail, the last flightless bird in the Indian Ocean. To explore the abundant crystal-clear waters of the vast lagoon and to set foot on atolls which have never been exploited by the hand of man is a rare experience. Our voyage continues to Madagascar, the world's 'eighth continent', where we have a week to explore this extraordinary country that is still relatively unknown amongst even the most serious of travellers. The term 'unique' is often an overused description in the travel world but certainly applies to the island of Madagascar where the animals, plants, landscapes and people that make up this thousand-mile-long island are unlike anywhere else in the world. There is minimal infrastructure in many parts of the island and for those wishing to explore in some depth, doing so by small ship is far more preferable than by any other means. This itinerary is a veritable feast of beauty and the natural world and with the vessel's fleet of Zodiac

landing craft we can reach the unreachable, landing on remote beaches, walking through verdant rainforest and national parks and getting close to some unique flora and fauna. Your experience will be made all the more memorable by our expert crew and officers who, along with our expedition team of marine biologists, ornithologists and botanists have many years of experience in the

Indian Ocean.
