

NATURAL TREASURES OF COSTA RICA CRUISE FROM SAN JOSE

Welcome to Aurora Expeditions' Natural Treasures of Costa Rica voyage. Costa Rica, meaning 'rich coast', is a nature lover's paradise. While it is a small country, Costa Rica contains approximately 6 percent of the world's biodiversity. The country has environmental conservation policies in place, roughly a quarter of the country is made up of protected jungle, and we are incredibly fortunate to explore the region on land and sea. We hope to observe the unique wildlife including a number of indigenous birds and animals such as the Marbled Wood Quail, hummingbirds, toucans, spider monkeys, iguanas, sloths and perhaps the rare and endangered Scarlet Macaw.

ITINERARY

Day 1 Arrive San Jose

Having made your way to San Jose, you will be met by a representative of Aurora Expeditions and transferred to our group hotel. Please visit the Aurora Expeditions hospitality desk to collect your luggage cabin tags and to speak with our ground operations team, who may have information to share with you about pre-embarkation or to provide you with information about where to dine, withdraw cash or purchase last minute items

from a local pharmacy or supermarket.

Enjoy free time, and in the evening, dine at your leisure (dinner not included).

Assigned accommodation: To be confirmed

Day 2 Embarkation Day

This morning, your luggage will be collected from the hotel and transferred directly to the port for sanitisation, clearance and delivered to your cabin ahead of your arrival on board. There is time to settle into your cabin before attending important safety briefings. Enjoy the thrill of departure as we 'throw the lines' and set sail for an exciting tropical adventure.

Day 3 Manuel Antonio National Park

Boasting over 100 species of mammals, 184 species of birds and an impressive variety flora, Manuel Antonio National Park understandably attracts wildlife enthusiasts from all over the world. Costa Rica's star attractions - two and three toed sloths, as well as white-faced monkeys, toucans, agoutis, armadillos and coatis are a few of the exciting animals that you may encounter within the park. We explore the park in the cool, early hours of the morning before returning to the vessel for lunch. In the afternoon, you have the option to explore Quepos town or enjoy some water activities.

Day 4 Rio Claro Wildlife Refuge

The untamed Osa Peninsula is considered by National Geographic to be 'one of the most biologically intense places on earth'. We plan to hike the trails at Rio Claro Wildlife Refuge, a sanctuary that encompasses 500 hectares of tropical rainforests, making it one of the most important natural

preserves in Central America. Rio Claro is one of the last refuges for pumas, ocelot, jaguarundis, tapirs, white-lipped peccaries and a host of other rainforest animals. The high plateau forests, with trees towering over 43 m (140 ft), supports hundreds of species of ferns, bromeliads and orchids, and creates a biological corridor between palm swamps and mangroves. It is an extension of Corcovado National Park, the country's largest and one of the most remote parks in Costa Rica.

Day 5 Punta Leona

Punta Leona is home to one of the last remaining forests that are found in the transitional life zone between the rainforests of the Southwest and the dry forests of the Northwest. Created over 25 years ago to protect the region's varied flora and fauna, the Punta Leona Refuge is a 300-hectare (750 acres) private nature reserve mainly consisting of lush primary and secondary forests.

Also functioning as a centre for bird and mammal research, this reserve is the habitat of over 330 migratory and native bird species. Home to rare and endangered Scarlet Macaw, the reserve is also the dwelling place of a number of indigenous birds and animals like the Marbled Wood Quail, the Three-wattled Bellbird, Hummingbirds, Toucans, Spider Monkeys, White-faced Monkeys, White-nosed Coatimundis, iguanas and a variety of beautiful butterflies.

Located near a pristine white sand beach, Punta Leona has three varied walking and hiking trails, all of which are easily accessible and perfect for bird watching.

Day 6 Curú National Wildlife Refuge / Isla Tortuga

Curu National Wildlife Refuge is a privately-owned nature reserve offering visitors outstanding eco-tourism experiences.

The refuge is the first privately-owned refuge in Costa Rica, encompassing more than 3,700 acres of tropical forests, mangroves, and well-marked paths. 17 hiking trails wind through the varied terrain within the reserve, where you may see white-tail deer, armadillos and iguanas. Various monkey species are prolific within refuge including native capuchin, spider, and howler monkeys. Located on the southern Nicoya Peninsula of north-western Costa Rica, the refuge is brimming with wildlife and hosts one of the most beautiful beaches and protected bays on the Nicoya Peninsula, a great place to enjoy water activities.

Afterwards, enjoy lunch on board as you sail to nearby Isla Tortuga (Turtle Island), where you can snorkel, swim, paddle or relax. The water is teeming with a dizzying array of tropical fish, big pufferfish, turtles, sting rays, white tip reef sharks, and occasionally dolphins.

This evening, celebrate a memorable journey at Captain's Farewell reception.

[Day 7 Disembark Puntarenas, transfer to San Jose](#)

Disembark in Puntarenas, where you'll farewell your expedition team before transferring to San Jose.

Note: At the conclusion of the voyage, we do not recommend booking flights departing San Jose prior to 12.00 pm. Please advise your departure flight information to your reservations consultant.

YOUR SHIP: SYLVIA EARLE

YOUR SHIP:

Sylvia Earle

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

Sylvia Earle made her inaugural cruise in 2022; she honours the highly accomplished marine biologist, oceanographer and explorer, Sylvia Earle. As the first female chief scientist of the U.S. National Oceanic and Atmospheric Administration, and named by Time Magazine as its first Hero for the Planet in 1998 - this vessel pays tribute to Sylvia's long standing conservation efforts for marine protected areas and ocean wildlife. Sylvia Earle will be actively involved in the development of her namesake. The streamlined Ulstein X-BOW® cuts through the swell so you feel fewer vibrations and disturbances, and makes quicker transits through waves. It also helps reduce fuel consumption by up to 60%^.

Experience the Glass Atrium Lounge inside the bow, featuring huge windows and superb views to the front of the ship. In between landings, enjoy the heated saltwater open air swimming pool and jacuzzis on board the Sylvia Earle and watch the world go by, or experience our gym, sauna or enjoy a massage (additional cost) in the Wellness centre. Sylvia Earle carries many Zodiacs, which you can board via four dedicated, sea-level launching platforms. These platforms make boarding the Zodiacs as quick, efficient and safe as possible, minimising wait times and getting you

closer to the action for longer. Dining One of the most important parts of any expedition is the food! Whatever adventures the day holds, you will be fuelled-up with hearty meals and delicious morning/afternoon teas cooked by our onboard chefs. Meals are a great time to soak up the expedition camaraderie in our open seating dining area. Share stories with your fellow travellers and ask our expedition team questions that may have come up during the day. Tea, coffee and snacks are available 24 hours a day, and our chefs offer different menu options and courses for each meal. Enjoy the range of house wine, beers and soft drinks included with dinner after a long day in the wild. We also invite you to join your captain and expedition team for informal Captain's Welcome and Farewell drinks, with complimentary beverages and cocktail appetisers, followed by a 3 course meal. Responsible Travel We believe that preserving and protecting the environment is of the utmost importance and this is reflected in several features of the Sylvia Earle. The Sylvia Earle will boast one of the lowest polluting marine engines in the world due to low energy consumption, high fuel-efficiency and a streamlined design to deliver an 80% reduction in emissions. The ship can also utilise virtual anchoring to hold its position using a combination of GPS, steering technology, propellers and thrusters. This protects the sea floor and minimises the damage caused by conventional anchors. Compared to Tier
