

NORTH SPITSBERGEN, BASECAMP, FREE KAYAKING, HIKING, PHOTO WORKSHOP, CLEANING THE SHORES

The North Spitsbergen Basecamp cruise offers you a myriad of ways to explore and enjoy this Arctic Region. This expedition allows you to hike, snowshoe, kayak, and learn to take perfect pictures of the polar flora and fauna. Background on Basecamp cruises: - Our Basecamp voyages focus on land and near-shore activities with minimal disturbance to local wildlife. If time and conditions permit, the expedition team will also look for wildlife opportunities whenever possible. By definition, a basecamp is a temporary camp from which expeditions or other outdoor activities can be carried out. During our designated Basecamp cruises, the ship navigates to carefully chosen areas around North Spitsbergen, staying in fewer locations than during our regular trips so that it can serve as a comfortable hub for multiple outdoor activities. Hikers (H) can embark on vigorous walks in the backcountry, photographers (P) can capture the dramatic surroundings in pictures, and kayakers (K) can explore waterways through which the ship cannot always sail. Passengers who do not wish to engage in these activities can enjoy Zodiac excursions and easy-to-moderate shoreline walks that focus on wildlife. All activities are free of charge. Cleaning the shores of Spitsbergen: - Interested in doing something good for the environment? We welcome you to participate in our ongoing effort to remove plastic waste and other rubbish from the shores of Spitsbergen. Garbage from the ocean, such as fishing gear and plastic litter, piles up on these shores. This litter is hazardous to the animals, which get entangled in fish nets and sometimes ingest micro-plastics that can lead to starvation and suffocation. Supported by AECO and the governor of Spitsbergen, we enjoy cleaning the beaches of Svalbard with our

passengers. All participants will be assisted by our guides and provided with collection bags. About 50 passengers will clean in the morning while the other 50 have their excursion in another area. Then in the afternoon, the groups switch roles. And if we cannot clean a certain area because of roaming bears or other concerns, we will find an

alternate area.

ITINERARY

Day 1: Largest town, biggest island

You touch down in Longyearbyen, the administrative center of Spitsbergen, the largest island of the Svalbard archipelago. Enjoy strolling around this former mining town, whose parish church and Svalbard Museum make for fascinating attractions. Though the countryside appears stark, more than a hundred species of plant have been recorded in it. In the early evening the ship sails out of Isfjorden, where you might spot the first minke whale of your voyage.

Day 2: Kongsfjorden and Blomstrandhalvøya

On the first day of our activity program, we will slowly ease into things. Blomstrandhalvøya is located on the northern side of the fjord, which will offer shelter and room to change plan in case the weather changes. In the afternoon, you visit Ny Ålesund, one of the northernmost settlements on Earth. Once a mining village served by the world's most northerly railway – you can still see its tracks – Ny Ålesund is now a research center. Close to the community is a breeding ground for barnacle geese, pink-footed geese, and Arctic terns. And if you're interested in the history of Arctic exploration, visit the anchoring mast used by polar explorers Amundsen and Nobile in their airships, Norge (1926) and Italia (1928). In the evening, we head north along the west coast and spend the night in the sheltered surroundings of Krossfjorden.

Day 3: Exploring the North West

Next to our activities, we will next head toward Amsterdamøya, where you have the chance to hike past the remains of a 17th-century whaling station. You can also enjoy the beautiful panorama of Smeerenburgsleta. In the afternoon, we make for the islands around Fair Haven.

Day 4: Rugged Raudfjorden

At Raudfjorden, on the north coast of Spitsbergen, you can take in an expansive fjord spilling with glaciers – and maybe even visited by ringed and bearded seals. The cliffs and shoreline of this fjord also support thriving seabird colonies, rich vegetation, and the possibility of polar bears. Here we will find the right balance between safe activities and wildlife watching.

Day 5: The stunning sights of Liefdefjorden

Depending on the weather, you could sail into Liefdefjorden and cruise within sight of the 5-kilometer-long (3.1 miles) face of Monaco Glacier. The waters in front of this glacier are a favorite feeding spot for thousands of kittiwakes, and the base of the ice is a popular polar bear hunting ground. If ice conditions prevent sailing here early in the season, we may use an alternate route along the west coast of Spitsbergen. Near the area of Texas Bar and Hornbaekpollen, there are also some great hikes.

Day 6: North Spitsbergen splendors

This is our reserve day for activities around North Spitsbergen. Weather and wildlife permitting, we will choose the right location for another day of splendid outdoor adventures.

Day 7: Forlandsundet or St. Johns Fjord

Forlandsundet, between the main island of Spitsbergen and the narrow Prins Karls Forland, is a place of great beauty and fascinating wildlife. Walruses sometimes haul out here, and seabirds can be found around Fuglehuken. You may also see walrus populations around Sarstangen and Poolepynten. Alternatively, we might sail into St. Johns Fjord or south to the mouth of Isfjorden, landing at Alkhornet. Seabirds nest on these cliffs, Arctic foxes search below for fallen eggs and chicks, and reindeer graze the sparse vegetation. We will arrive in Longyearbyen later that night.

Day 8: There and back again

Every adventure, no matter how grand, must eventually come to an end. You disembark in Longyearbyen, taking home memories that will accompany you wherever your next adventure lies.

Please Note:

All itineraries are for guidance only. Programs may vary depending on ice, weather, and wildlife conditions. Landings are subject to site availabilities, permissions, and environmental concerns per AECO regulations. Official sailing plans and landing slots are scheduled with AECO prior to the start of the season, but the expedition leader determines the final plan. Flexibility is paramount for expedition cruises. The average cruising speed of our vessel is 10.5 knots.

YOUR SHIP: ORTELIUS

YOUR SHIP: Ortelius

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

The ice-strengthened vessel "Ortelius" is an excellent vessel for Polar expedition cruises in the Arctic and Antarctica, providing possibilities to adventure remote locations such as the Ross Sea. The vessel has the highest ice-class notation (UL1 equivalent to 1A) and is therefore very suitable to navigate in solid one-year sea ice and loose multi-year pack ice. "Ortelius" is a great expedition vessel for 100 passengers with lots of open-deck spaces and a very large bridge which is accessible to the passengers. The vessel is manned by 34 highly experienced crew, 15 international catering staff, including stewardesses, 6 expedition staff (1 expedition leader and 5 guides/lecturers) and 1 doctor. "Ortelius" offers a comfortable hotel standard, with two restaurants, a bar/lecture room and a sauna. Ortelius' voyages are primarily developed to offer our passengers a quality exploratory wildlife program, trying to spend as much time ashore as possible. As the number of passengers is limited to approximately 100 on the "Ortelius", flexibility assures maximum wildlife opportunities. Passengers on a typical voyage range from in their 30s to their 80s, with the majority usually between 45 - 65. Our expeditions attract independent travelers from around the globe who are characterized by a strong interest

in exploring remote regions. The camaraderie that develops on board is an important part of the Oceanwide experience, and many passenger groups include several nationalities. "Ortelius" was built in Gdynia, Poland in 1989, was named "Marina Svetaeva", and served as a special purpose vessel for the Russian Academy of Science. The vessel is re-flagged and renamed "Ortelius". Ortelius was a Dutch / Flemish cartographer. Abraham Ortelius (1527 - 1598) published the first modern world atlas, the Theatrum Orbis Terrarum or Theatre of the World in 1570. At that time, the atlas was the most expensive book ever printed. What to Wear In keeping with the spirit of expedition, dress on board is informal. Bring casual and comfortable clothing for all activities, and keep in mind that much of the scenery can be appreciated from deck which can be slippery. Bring sturdy shoes with no-slip soles, and make sure your parka is never far away in case one of our crew shouts "Whales!" over the loudspeaker and you have to dash outside in a moment's notice. Opt for layers, as it is comfortably warm aboard the ship though often cold on deck. Electric Current The electrical supply aboard ship is 220v, 60Hz. Electrical outlets are standard European with two thick round pins, so some passengers may need a 220v/110v converter. Tipping The customary gratuity to the ship's service personnel is made as a blanket contribution at the end of the voyage and is divided among the crew. Tipping is a personal matter, and the amount you wish to give is at your sole discretion. As a generally accepted guideline, we suggest 8 - 10 euros per passenger per day. It is better for the crew if you give cash. Smoking Policy Ortelius has a non-smoking policy inside, though you can smoke

A group of people in a zodiac boat on a glacier lake. The boat is filled with people wearing winter gear, some waving. The water is surrounded by large icebergs and glaciers in the background under a cloudy sky.
