PATAGONIA: CHILEAN FJORDS AND ARGENTINA'S STATEN ISLAND

Discover the fjords, glaciers, and panoramic vistas that make Chilean Patagonia one of the most lauded nature destinations on Earth. Venture by Zodiac and kayak to explore Chile's deeply indented coastline. Glide into fjords and inlets beneath walls of blue ice, hike on shore with naturalists, and watch for elephant seals, Magellanic penguins, and Andean condors. Explore the seldom-seen natural splendors of Karukinka Natural Park and Isla de los Estados (Staten Island) where we have special access to nature reserves filled with stunning landscapes.

ITINERARY

DAY 1: Santiago, Chile

Arrive in Santiago and transfer from the airport to the Ritz-Carlton, Santiago (or similar) before our guided overview of this vibrant city backed by the inspiring Andes. Discover sites like the Plaza de Armas and get a feel for the mix of old and new that makes this city so great. In the early evening, we gather for an informal welcome reception and a drink at the hotel.

Arrival Time: Arrive before 11:00 a.m. local time.

Arrival City: Santiago, Chile

DAY 2 Punta Arenas / Puerto Natales / Embark Ship / Kirke or White Narrows

Today we fly from Santiago to Punta Arenas, Chile's southern gateway to Patagonia. From there, we will drive to the outpost of Puerto Natales, and embark our ship. Be on deck to look for wildlife as our Captain guides us through the Kirke or White Narrows--always a challenge to navigate because of the powerful currents that flow through its pinch points.

Meals Included: Breakfast, Lunch, Dinner

DAYS 3-4 Chilean Fjords

Today and during the following days our guests are treated to the spectacular features of an active glaciated landscape with hanging valleys and tributary glaciers. This region was navigated by Ferdinand Magellan's expedition and it took most of November 1520 for his ships to find a way through the channels that lie between the continental mainland and Tierra del Fuego to the south. We look to make a first stop in the extensive maze of channels and islands of the Chilean fjords, where we may go out by Zodiac and kayak.

Meals Included: Breakfast, Lunch, Dinner

DAY 5 Tierra del Fuego / Karukinka Natural Park

Tierra del Fuego is one of Patagonia's crown jewels. We visit its newest and largest protected area: Karukinka Natural Park. Established in 2004 through a gift from Goldman Sachs, Karukinka is one of the largest donations ever made for conservation. We are thrilled to have special permission from the Wildlife Conservation Society to visit this private reserve, which spans 1,160 square miles and harbors the endangered culpeo fox, Andean condors, albatrosses, grebes, petrels, fulmars, shearwaters, and many other kinds of wildlife. We may explore Jackson Bay, backed by a skyline of rugged mountains, and look for wildlife including black-browed albatrosses, which nest on one of the nearby small islands. We may walk a trail to a lovely waterfall and look for elephant seals resting on not only the beach but also high in the grass meadows and even in the small river draining the valley inland.

Meals Included: Breakfast, Lunch, Dinner

DAYS 6-7 Chilean Fjords / Beagle Channel

We experience more stunning wilderness as we explore the fjords and glaciers of the region by Zodiac, kayak, and on foot. We take Zodiacs out to explore these protected waters and rugged shores, keeping watch for the shearwaters, petrels, albatrosses, and many other birds that inhabit this otherworldly realm.

Sail the Beagle Channel and look to hike and kayak one of the wild areas in this region of beech forests, mountains, and rivers. This southernmost corner of the South American continent is also home to Cape Horn, the island at the convergence of the Atlantic and Pacific oceans, famously difficult waters that, throughout the centuries, has been the graveyard of many ships from the time before the Panama Canal.

Meals Included: Breakfast, Lunch, Dinner

DAYS 8-9 Isla de Los Estados (Staten Island), Argentina

We have been given special permission to visit extraordinary Staten Island, and our ship is one of the only expedition ships ever allowed here. It is a place of superlatives, barely touched in recent decades and visited primarily by a few scientists and the staff of the tiny naval observatory. The island was named by Dutch explorers in 1615. Its mountainous, forested landscapes and rugged fjords are beautiful, and there is much to discover here. Our exact schedule remains flexible to take best advantage of conditions. We search for southern rockhopper and Magellanic penguins, other waterbirds, fur seals, and sea lions. We also look for otters on our landings ashore, and we see the replica of the 1884 San Juan de Salvamento "lighthouse at the end of the world," which inspired Jules Verne's novel by the same name. There are chances to walk in the southern beech forests. These days are bound to stand out as a unique chance to explore a very remote place.

Meals Included: Breakfast, Lunch, Dinner

DAY 10 Ushuaia, Argentina / Disembark Ship / Buenos Aires, Argentina or Santiago, Chile / Home Today we disembark in Ushuaia. Fly to Buenos Aires (National Geographic Explorer) or Santiago (National Geographic Resolution) and connect with your flight home

Departure Time: Depart after 9:00 p.m. local time.

Departure City: Buenos Aires, Argentina, or Santiago, Chile

Meals Included: Breakfast

YOUR SHIP: NATIONAL GEOGRAPHIC ENDURANCE

YOUR SHIP: **National Geographic Endurance**

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

A next-generation expedition ship, purpose-built for polar navigation. National Geographic Endurance is a next-generation expedition ship, purpose-built for polar navigation. A fully stabilized, highly strengthened, ice-class Polar Code PC5 (Category A) vessel, it is designed to navigate polar passages year-round, and safely explore unchartered waters, while providing exceptional comfort. Its patented X-BOW® is key to its design; its powerful wave-slicing action provides an extremely smooth ride in even adverse conditions, and even reduces spray on deck, for superior observation. She carries a full suite of expedition tools and offers a variety of experience-enhancing amenities. The luxury of comfort on expedition National Geographic Endurance comfortably accommodates 126 guests in 69 outside-facing cabins. Cabins are efficiently designed, with sizes range from the 140-square-foot solo cabin to the 430-square-foot category 7 suite. Fifty-three of the 69 cabins, including all 12 of the solo cabins, will feature small balconies with floor-to-ceiling sliding doors that bring in the spectacular views and ample natural light. Comfort & convenience in every room Every cabin has two portholes, a large window or balcony, and temperature controls. Bathrooms are modern and stocked with botanically inspired hair products, soap, and shower gel, plus a hairdryer. Cabins are equipped with expedition command centers with tablets and USB/mobile device docking, TVs, Wi-Fi connections, and hair dryers. Dining: Food served aboard is fresh, local, and delicious, and sourced from suppliers who share our values of sustainable use whenever possible. Meals aboard are almost always served in the dining room, located aft of the lounge deck. When weather conditions allow, lighter fare may be served on the observation deck. There is no assigned seating and our dining room accommodates the entire expedition community in a single seating. During meals your expedition leader, naturalists, and any guest speakers aboard will join you. Public Areas: Two restaurants, a Chef's Table for small group dining, Observation Lounge with bar, gym, Wellness area, infinity-style outdoor hot tubs, library, main lounge with full service bar, 24-hour beverage, state-of-the-art facilities for films, slideshows and presentations, and a photo workshop area; plus, an expedition base with lockers for expedition gear, and an "open bridge" for access to our captain, officers and the art of navigation. Meals: Two restaurants, featuring local, sustainable choices and unassigned seating for flexible, inclusive dining; plus a Chef's table for intimate, small group dining. Main restaurant has 270° views, and the Observation deck restaurant features lighter, made-to-order fare. Cabins: All cabins face outside with large windows, private facilities and climate controls. 53 cabins have balconies. Cabins are equipped with expedition command centers with tablets and USB/mobile device docking, TVs, Wi-Fi connections, and hair dryers. Expedition Tools: Zodiac landing craft, kayaks,

snowshoes, cross-country skis, undersea specialist operating a remotely Operated Vehicle (ROV) and underwater video camera for unique access to polar marine world, hydrophone, aerial remote-controlled camera and video microscope. Special Features: A full-time doctor, undersea specialist, National Geographic photographer, Lindblad-National Geographic certified photo instructor and video chronicler, an internet cafe and laundry. Wellness: The vessel is staffed by our wellness specialists and features a glass-enclosed yoga studio, gym, treatment rooms and spa relax area, and high- and low-heat saunas with ocean views. Expedition Landing Craft: Key to our operation is our fleet of expedition landing craft, which we use to land in places that would otherwise be inaccessible. With 8 of these boats and two loading stations used every time we disembark, we're able to transfer guests off the ship quickly, so you can be out on adventures, not idly waiting. The expedition landing craft we use are 19 feet long, powered by four-stroke outboard engines, and are capable of comfortably carrying 10-12 people. They are widely recognized as the safest and most versatile small boats afloat. Remotely Operated Vehicle: Capable of reaching 1,000 feet, far beyond the range of any Scuba diver, the ROV allows you to literally view parts of the undersea that are as unexplored as the moon. Chances are you, like many of our guests, will be struck by how surprisingly colorful undersea life is in these unlikely places. And this glimpse may fundamentally change how you view the ocean. Kayaks: National Geographic Endurance will be equipped with a fleet of kayaks large enough to ensure everyone who wants to can paddle at every opportunity. Consequently, prior kayaking experience isn't necessary--many of our guests have their first kayaking experience in extraordinary locations. Our custom-designed floating platform lets us deploy kayaks from the ship, or any location we want--including far from shore. Kayakers are usually free to explore where they want within boundaries set by the undersea specialist and officer of the watch. Underwater camera: Our undersea specialist will dive often during your expedition, even in Alaska, with cold-water gear, to shoot high-definition, Cousteau-like footage of the deep. Colorful nudibranchs, swimming, plant-like crinoids, and mysterious fish with antifreeze blood that thrive in the frigid sea will give you an entirely new appreciation of the marine environment. Video microscope: Naturalists will use the video microscope to help explain all elements of the environment, including tiny organisms that are the building block of the marine ecosystem. Spellbinding live views of krill at 80x magnification fills the high-definition screens in the lounge with vivid detail, and fills every onlooker with a sense of wonder at the importance of otherwise unobservable creatures. Hydrophone: This underwater microphone is deployed to listen to the vocalizations of marine mammals. Real time transmissions of their eerie, haunting sounds can be broadcast through the ship or recorded for later playback. Few experiences in nature are as captivating as watching humpback whales feed close to the ship as their vocalizations play through the ship's PA system. Electronic charts: An electronic chart showing the ship's location, course, and speed is almost always on display in the lounge. Open bridge: You'll find our captains are engaged, knowledgeable members of your expedition who are eager to share their passion with you. Venture's open bridge features comfortable spaces to sit, enjoy the view, drink your morning coffee, or simply chat with the officers. Snorkeling gear & wetsuits: On warm weather itineraries where there will be snorkeling, you'll select a mask, snorkel, fins, and wetsuit that remain yours for the duration of the expedition. There's no need

to pack and tote your own gear, although guests who prefer to are welcome to bring

their own.
