

## REYKJAVIK TO LONGYEARBYEN: ARCTIC EXPEDITION CRUISE

Join us for a journey from Iceland to Svalbard, Norway, visiting isolated islands and remote regions. Aboard the Silver Cloud go past spectacular bird cliffs in Iceland, marvelling at the multitude of puffins, guillemots and gulls that congregate to nest. While in Iceland, explore the area around Lake Myvatn to see how geology plays an important factor in Iceland's daily life, or go whale-watching along Iceland's northern coast. In Svalbard, encounter fascinating landscapes, mountains, fjords and glaciers while looking for walrus and polar bears. Throughout the voyage, learn about the geology, wildlife, botany and history of this spectacular area from lecture presentations offered by your knowledgeable onboard Expedition Team.

### ITINERARY

#### Day 1 REYKJAVIK

Sprawling Reykjavík, the nation's nerve center and government seat, is home to half the island's population. On a bay overlooked by proud Mt. Esja (pronounced eh-shyuh), with its ever-changing hues, Reykjavík presents a colorful sight, its concrete houses painted in light colors and topped by vibrant red, blue, and green roofs. In contrast to the almost treeless countryside, Reykjavík has many tall, native birches, rowans, and willows, as well as imported aspen, pines, and spruces. Reykjavík's name comes from the Icelandic words for smoke, reykur, and bay, vík.

#### Day 2 LATRABJARG CLIFFS & DYNJANDI WATERFALLS

On Iceland's north coast and close to the westernmost tip of the country are the impressive cliffs of Latrabjarg; Europe's largest bird cliff. Millions of individual seabirds make their home along the promontory safe from the range of scavenging foxes on the steep ledges. Atlantic Puffins, Northern Gannets, Razorbills and guillemots have each selected their preferred areas in and above the cliff in which to roost and nest. The Latrabjarg cliffs reach heights of up to 440 meters along a staggering 14 kilometer stretch of the coast. Iceland is well-known for its spectacular waterfalls. The iconic Dynjandi waterfall, located in the Westfjords region, is regarded as one of Iceland's most impressive and majestic waterfalls. At the top, the cascading water is roughly 100 feet wide and tumbles down about 330 feet into the fjord. Its name Dynjandi means, "the thundering one" and its vast size, enormous sound, and sheer force is overwhelming. It has also been nicknamed, 'The Bridal Veil' because of the way the water sprays and spreads over the rocks.

#### Day 3 VIGUR ISLAND & CRUISE ALONG HORNBJARD CLIFFS

Vigur Island is a little more than a mile (1.6 km) in length and about 450 yards (412 m) wide. This green oasis punctuates the waters of the Ísafjarðardjúp fjord east of the town of Ísafjörður. The island is home to a single farming family and has some meticulously preserved historical landmarks including Iceland's only windmill, built in 1840 and used until 1917 for grinding imported wheat from Denmark; and a 200-year-old rowing boat, which is still in use to ferry sheep to the mainland. Summer is the best time to see large numbers of Atlantic Puffins, Arctic Terns and Black Guillemots.

#### Day 4 AKUREYRI

Akureyri, called the Capital of the North is the second largest urban area in Iceland, and a lively one at that. Hemmed by the 60-km (37-mile) long Eyjafjörður, Akureyri is sheltered from the ocean winds and embraced by mountains on three sides. Late 19th-century wooden houses impart a sense of history, and the twin spires of a modern Lutheran church rising on a green hill near the waterfront, provide a focal point. To the south of Akureyri is the pyramid-shape rhyolite mountain Sútur. Beyond it is Kerling, the highest peak in Eyjafjörður District.

#### Day 5 DAY AT SEA

Days at sea are the perfect opportunity to relax, unwind and catch up with what you've been meaning to do. So whether that is whale watching from the Observatory Lounge, writing home to your loved ones or simply topping up your tan by the pool, these blue sea days are the perfect balance to busy days spent exploring shore side.

#### Day 6 JAN MAYEN ISLAND

Humpback and minke whales cavort and feed in the waters around the impressive volcanic island of Jan Mayen with its towering ebony peaks and broad black lava beaches. The primordial landscape is dominated to the north by the 7,500 feet high (2,300 meters) Mt Beerenberg, an active volcano covered in glacial ice that last erupted in 1985. With permission from the Norwegian authorities, a landing is possible at this rarely visited outpost.

#### Day 7 DAY AT SEA

Days at sea are the perfect opportunity to relax, unwind and catch up with what you've been meaning to do. So whether that is whale watching from the Observatory Lounge, writing home to your loved ones or simply topping up your tan by the pool, these

blue sea days are the perfect balance to busy days spent exploring shore side.

#### Days 8 - 11 SVALBARD NORTHERN REGION

There are several deep fjords and prominent glaciers in the northern reaches of Svalbard, as well as the northern hemisphere's widest glacier front. Ice conditions will dictate how much can be accessed in terms of cruising bird islets like the Andøyane Islets or approaching glaciers like Monaco Glacier and Seliger Glacier. The Northern Region is also known to have several walrus haul-outs and areas defined as "Arctic Desert". Walks and hikes ashore to have a closer look at flora and wildlife are a possibility in the spectacular Northern Region of Svalbard.

#### Day 12 LONGYEARBYEN

Longyearbyen is the biggest settlement in Svalbard. Seat of the Norwegian administration, it also has the best services and infrastructure in the archipelago. Located deep in the Adventfjord, a sidearm of the Isfjorden (Icefjord), Longyearbyen's airport can be used all-year round, but its harbor is blocked by ice in winter. Most shops, hotels, restaurants and a hospital are within easy walking distance of the port.

#### Please Note:

Expedition highlights and itinerary listed here are possible experiences only and cannot be guaranteed. Your Expedition Leader and Captain will work together to ensure opportunities for adventure and exploration are the best possible, taking into account the prevailing weather, wildlife activity and ice conditions. Expedition Team members scheduled for this voyage are subject to change or cancellation.

## YOUR SHIP: SILVER CLOUD

**YOUR SHIP:** Silver Cloud

**VESSEL TYPE:**

**LENGTH:**

**PASSENGER CAPACITY:**

**BUILT/REFURBISHED:**

With 18-brand new Zodiacs, four superlative restaurants in Antarctica and a pole to pole expedition itinerary, Silver Cloud really does break the ice between expedition and luxury. Spacious yet intimate, designed to cross oceans and yet able to slip up rivers and into hidden harbours with ease, the yacht-like Silver Cloud carries just 296 guests in incomparable comfort and style. Combining spacious ocean-view suites and private verandas with stunning dining and entertainment options, Silver Cloud provides world-class cruise accommodations, service and amenities. After extensive refurbishment, Silver Cloud is the most spacious and comfortable ice class vessel in expedition cruising. Her large suites, her destination itineraries and her unparalleled service make her truly special. Her four dining options will tantalise your taste buds and as 80% of her suites include a veranda, watching a breaching whale or a few cavorting penguins has never been so personal. She carries a limited number of guests in polar waters, meaning that Silver Cloud has the highest space to guest and crew to guest ratios in expedition cruising. With her 18 zodiacs, 10 kayaks, possibilities are almost limitless with ship-wide simultaneous explorations.
