

SOUTHEAST GREENLAND: EXPLORING AT THE EDGE OF THE ICE CAP

Discover the true thrill of exploration as you navigate Southeast Greenland's rugged coast, sailing through unchartered waters fed by the legendary ice cap. Each day brings the prospect of unforgettable experiences as your veteran captain and expedition team chart a course for remote fjords, glaciers, mountains and trails that few have yet to explore. Zodiac cruise and kayak among spectacular icebergs; hike into the wild backcountry to spot Arctic wildlife; and uncover the secrets of ancient Greenlandic cultures at fascinating archaeological sites nestled amid this untamed landscape.

ITINERARY

Day 1 Reykjavík, Iceland / Embark Ship

Arrive in Reykjavik, the world's northernmost capital, which lies just below the Arctic Circle. Transfer from the airport and spend the day exploring the city's sights, sounds and tastes on your own. Check in with the hospitality desk this afternoon, before embarking the ship.

Day 2-3 Crossing the Denmark Strait / At Sea

Sail across the Denmark Strait, connecting the Arctic and Atlantic Ocean. The Strait is home to the world's largest waterfall, caused by powerful currents and glaciers. Listen to talks from experts, relax with a book in the lounge or on the observation deck and keep an eye out for whales as the ship travels across the continental shelf.

Day 4-8 Exploring King Frederick VI Land, Greenland

Spend the days exploring the coastal wilds of Southeast Greenland, a dynamic region known for its striking landscapes of towering peaks and active glaciers which connect to the Greenlandic Ice Sheet. The East Greenlandic current also spends much of the summer pushing icebergs down the coast from the North Pole. Experience a true sense of adventure as you discover unknown, wild areas aboard purpose-built ships designed to navigate even the most extreme conditions.

Take in stunning views from the Bridge of unexplored fjords like Skjoldungen, Lindenow and Timmiarmiut; Zodiac cruise along glaciers that continue to push out from the Ice Sheet; and hike into the backcountry with polar bear guards, keeping an eye out for the newly established resident population in this region. At archaeological sites along King Frederick VI Coast, gain insight into the Paleo-Inuit and Thule peoples who researchers believe inhabited the area between 2500-800 BC.

Day 9 At Sea

Spend a relaxing day at sea en route back to Iceland as you take advantage of the onboard amenities at your own pace. Join the ship's officers on the Bridge and keep a watchful eye for migrating whales, attend an engaging presentation by naturalists and experts, or enjoy a wellness treatment at the spa.

Day 10 Reykjavík, Iceland / Disembark Ship

Disembark in Reykjavik and transfer to the airport for flights home.

Itineraries are subject to change.

YOUR SHIP: NATIONAL GEOGRAPHIC ENDURANCE

YOUR SHIP: National Geographic Endurance

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

A next-generation expedition ship, purpose-built for polar navigation. National Geographic Endurance is a next-generation expedition ship, purpose-built for polar navigation. A fully stabilized, highly strengthened, ice-class Polar Code PC5 (Category A) vessel, it is designed to navigate polar passages year-round, and safely explore unchartered waters, while providing exceptional comfort. Its patented X-BOW® is key to its design; its powerful wave-slicing action provides an extremely smooth ride in even adverse conditions, and even reduces spray on deck, for superior observation. She carries a full suite of expedition tools and offers a variety of experience-enhancing amenities. The luxury of comfort on expedition National Geographic Endurance comfortably accommodates 126 guests in 69 outside-facing cabins. Cabins are efficiently designed, with sizes range from the 140-square-foot solo cabin to the 430-square-foot category 7 suite. Fifty-three of the 69 cabins, including all 12 of the solo cabins, will feature small balconies with floor-to-ceiling sliding doors that bring in the spectacular views and ample natural light. Comfort & convenience in every room Every cabin has two portholes, a large window or balcony, and temperature controls. Bathrooms are modern and stocked with botanically inspired hair products, soap, and shower gel, plus a hairdryer. Cabins are equipped with expedition command centers with tablets and USB/mobile device docking, TVs, Wi-Fi connections, and hair dryers. Dining: Food served aboard is fresh, local, and delicious, and sourced from suppliers who share our values of sustainable use whenever possible. Meals aboard are almost always served in the dining room, located aft of the lounge deck. When weather conditions allow, lighter fare may be served on the observation deck. There is no assigned seating and our dining room accommodates the entire expedition community in a single seating. During meals your expedition leader, naturalists, and any guest speakers aboard will join you. Public Areas: Two restaurants, a Chef's Table for small group dining, Observation Lounge with bar, gym, Wellness area, infinity-style outdoor hot tubs, library, main lounge with full service bar, 24-hour beverage, state-of-the-art facilities for films, slideshows and presentations, and a photo workshop area; plus, an expedition base with lockers for expedition gear, and an "open bridge" for access to our captain, officers and the art of navigation. Meals: Two restaurants, featuring local, sustainable choices and unassigned seating for flexible, inclusive dining; plus a Chef's table for intimate, small group dining. Main restaurant has 270° views, and the Observation deck restaurant features lighter, made-to-order fare. Cabins: All cabins face outside with large windows, private facilities and climate controls. 53 cabins have balconies. Cabins are equipped with expedition command centers with tablets and USB/mobile device docking, TVs, Wi-Fi connections, and hair dryers. Expedition Tools: Zodiac landing craft, kayaks,

snowshoes, cross-country skis, undersea specialist operating a remotely Operated Vehicle (ROV) and underwater video camera for unique access to polar marine world, hydrophone, aerial remote-controlled camera and video microscope. Special Features: A full-time doctor, undersea specialist, National Geographic photographer, Lindblad-National Geographic certified photo instructor and video chronicler, an internet cafe and laundry. Wellness: The vessel is staffed by our wellness specialists and features a glass-enclosed yoga studio, gym, treatment rooms and spa relax area, and high- and low-heat saunas with ocean views. Expedition Landing Craft: Key to our operation is our fleet of expedition landing craft, which we use to land in places that would otherwise be inaccessible. With 8 of these boats and two loading stations used every time we disembark, we're able to transfer guests off the ship quickly, so you can be out on adventures, not idly waiting. The expedition landing craft we use are 19 feet long, powered by four-stroke outboard engines, and are capable of comfortably carrying 10-12 people. They are widely recognized as the safest and most versatile small boats afloat. Remotely Operated Vehicle: Capable of reaching 1,000 feet, far beyond the range of any Scuba diver, the ROV allows you to literally view parts of the undersea that are as unexplored as the moon. Chances are you, like many of our guests, will be struck by how surprisingly colorful undersea life is in these unlikely places. And this glimpse may fundamentally change how you view the ocean. Kayaks: National Geographic Endurance will be equipped with a fleet of kayaks large enough to ensure everyone who wants to can paddle at every opportunity. Consequently, prior kayaking experience isn't necessary--many of our guests have their first kayaking experience in extraordinary locations. Our custom-designed floating platform lets us deploy kayaks from the ship, or any location we want--including far from shore. Kayakers are usually free to explore where they want within boundaries set by the undersea specialist and officer of the watch. Underwater camera: Our undersea specialist will dive often during your expedition, even in Alaska, with cold-water gear, to shoot high-definition, Cousteau-like footage of the deep. Colorful nudibranchs, swimming, plant-like crinoids, and mysterious fish with antifreeze blood that thrive in the frigid sea will give you an entirely new appreciation of the marine environment. Video microscope: Naturalists will use the video microscope to help explain all elements of the environment, including tiny organisms that are the building block of the marine ecosystem. Spellbinding live views of krill at 80x magnification fills the high-definition screens in the lounge with vivid detail, and fills every onlooker with a sense of wonder at the importance of otherwise unobservable creatures. Hydrophone: This underwater microphone is deployed to listen to the vocalizations of marine mammals. Real time transmissions of their eerie, haunting sounds can be broadcast through the ship or recorded for later playback. Few experiences in nature are as captivating as watching humpback whales feed close to the ship as their vocalizations play through the ship's PA system. Electronic charts: An electronic chart showing the ship's location, course, and speed is almost always on display in the lounge. Open bridge: You'll find our captains are engaged, knowledgeable members of your expedition who are eager to share their passion with you. Venture's open bridge features comfortable spaces to sit, enjoy the view, drink your morning coffee, or simply chat with the officers. Snorkeling gear & wetsuits: On warm weather itineraries where there will be snorkeling, you'll select a mask, snorkel, fins, and wetsuit that remain yours for the duration of the expedition. There's no need

to pack and tote your own gear, although guests who prefer to are welcome to bring

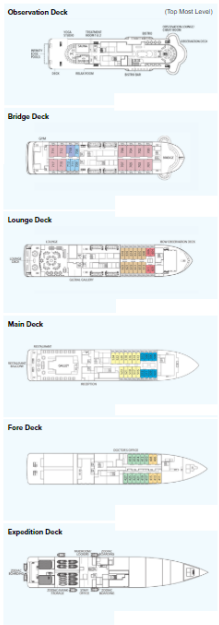

their own.
