SOUTHERN ODYSSEY: NEW ZEALAND AND THE SUBANTARCTIC ISLANDS

Navigating New Zealand's verdant coastlines we will encounter pristine beaches, quiet coves, and waters filled with whales, dolphins, and seals. The soaring peaks and countless waterfalls of the country's dazzling fjords are at their jaw-dropping best in Fiordlands National Park, where we spend two days exploring Milford Sound and Dusky Sound. Step into an ancient rainforest, stunning national parks, and fragrant botanical gardens; learn about Maori history and culture and tour cosmopolitan cities. An ornithologist's dream, New Zealand boasts 300 species of birds including the magnificent royal albatross and a colony of 20,000 gannets. Below the South Island in the Southern Ocean lie the remote and wildly beautiful sub-Antarctic islands where few humans have tread. Teeming with major populations of pelagic seabirds and animals and plants found nowhere else in the world, they burst with thousands of seals and millions of penguins.

ITINERARY

DAY 1: Auckland, New Zealand

Arrive in Auckland, where we check in to our hotel. Join us for a welcome briefing this evening to meet your fellow travelers.

DAY 2: Auckland/Embark

Have breakfast at the hotel before joining a tour of this vibrant city center. We'll stop for lunch midday before embarking National Geographic Orion in the late afternoon. (B,L,D)

DAY 3-4: Exploring Coastal New Zealand

As we continue south along the North Island's verdant coast, we let nature guide us as your Captain and Expedition Leader choose our next site for exploration. (B,L,D)

DAY 5: Gisborne

Today we delve into the cultural riches of Gisborne – the site of the first European landing place in New Zealand in 1769. The city's warm, sun-filled climate reflects its disposition and complements its rich soils, bountiful islands, miles of sandy beaches and resource-rich oceans. Visit a local Marae and gain insight into the history and culture of the people of this region. In the afternoon, discover the greenery of a local arboretum, and cap the day off with a wine tour and tasting. (B,L,D)

DAY 6: Napier

Spend the morning getting to know Napier, the Art Deco capital of New Zealand. Choose to discover the city's unique architecture on an art tour, or leave the city behind and join us on a Gannet Safari Tour where we'll have close encounters at a large Australasian gannet colony. (B,L,D)

DAY 7-8: Abel Tasman & At Sea

Today we arrive at the South Island of New Zealand where golden beaches and dense rainforests border the snow-capped Southern Alps. We begin discovering this stunning island in Abel Tasman National Park, exploring on hikes and walks with our naturalists. Spend the next day at sea as we sail south toward

Fiordland National Park. (B,L,D)

DAY 9-10: Milford Sound & Dusky Sound

Over the course of two days we will explore Fiordland National Park, home to fourteen individual fiords. Here we'll discover hundreds of meter high waterfalls, snowcapped peaks, and we'll hope for a glimpse of the Sounds' resident bottlenose dolphins, fur seals, and penguins. (B,L,D)

DAY 11: Snares Islands

Located south of the New Zealand mainland in the remote Southern Ocean, today we begin our exploration of the wild and beautiful sub-Antarctic islands. These remote islands play host to abundant and unique wildlife, with many species of birds, plants and invertebrates found nowhere else in the world. Two small rocky islands, North East and Broughton, comprise The Snares, the closest subantarctic islands to New Zealand. The islands are covered with heavy tussock grass and wind-beaten forests of tree daisies. The Snares are home to huge numbers of breeding birds: the 99 recorded species include albatross, Antarctic terns and Snares crested penguins. (B,L,D)

DAY 12-13: Auckland Islands & At Sea

Spend the next several incredible days discovering New Zealand and Australia's subantarctic islands and their surrounding waters –the entire marine landscape designated a UNESCO World Heritage site. We have special permission to explore these strictly regulated islands, which are protected at the highest level of conservation status by the New Zealand government, and considered "bird central" among top ornithologists around the world. Keeping a flexible weather-dependent schedule, we plan to explore several intriguing islands. The Auckland Islands are the largest of New

Zealand's subantarctic islands, with the richest flora, prolific birdlife, and an interesting human history. Conditions permitting, we cruise in Zodiacs to Enderby Island to view a large New Zealand sea lion colony with pups all jostling for position. If we are fortunate, we may see rare yellow-eyed penguins as they move to and from their nests in the forests beyond the beach.

DAY 14-16: Macquarie Island, Australia & At Sea

We will spend two days at remote Macquarie Island, a protectorate of Australia and a World Heritage site. Macquarie is home to a large variety of wildlife, including thousands of seals and millions of penguins. Four species of penguin breed here. The endemic royal penguin has a population estimated at 850,000. Gentoo and southern rockhopper penguins also breed here. And imagine landing on a single beach with 100,000 pairs of king penguins, the third largest such colony in the world! With whales beneath and birds above, our time at sea between islands presents an opportunity to head up to the bridge to spot marine life and watch the calm business of navigation. Or spend these days enjoying the ship's spa, and fitness center. Take some time to browse the library or play a board game in the glass-enclosed observation lounge. And listen to a variety of engaging talks from our staff, including photo talks. (B,L,D)

DAY 17-18: Campbell Island

A large island, surrounded by 4 smaller islands and innumerable rocks and islets, the Campbell Island group is officially the southernmost territory of New Zealand. Covered with endemic grasses and thick vegetation and boasting steep terrain, Campbell is dramatic and beautiful. Here we will find six species of albatross, an endemic duck (the Campbell Island teal), and an endemic snipe, as well as numerous songbirds and sea birds

who breed on the island. Three species of penguin also make their home on here, and southern right whales breed in the surrounding waters.

DAY 19: Stewart Island

Stewart Island, known in Maori as Te Punga o Te Waka a Maui, is positioned firmly at the heart of Maori mythology. Today we'll explore the island's rare native birdlife as well as its well preserved podocarp forest. In the afternoon, discover Stewart Island's nearby neighbor, Ulva Island, where we'll hike with naturalists to discover its unspoiled rainforest. (B,L,D)

DAY 20: Dunedin/Disembark/Home

Today we disembark on New Zealand's South Island in Dunedin, known for its Victorian and Edwardian architecture. Have breakfast aboard before transferring to the airport for flights home. (B)

YOUR SHIP: NATIONAL GEOGRAPHIC ORION

YOUR SHIP:	National Geographic Orion
VESSEL TYPE:	Luxury Expedition
LENGTH:	103 metres
PASSENGER CAPACITY:	102 (in 53 cabins)
BUILT/REFURBISHED:	2003 / Refurbished 2014

Engineered for maximum comfort and safety, *Orion* is equipped with the latest technology including large retractable stabilizers, sonar, radar, and an ice-strengthened hull. A shallow draft plus bow and stern thrusters provide the convenience of being able to maneuver close to shore. 14 Zodiacs ensure quick disembarkation and offer the ideal transport for up-close exploration. *National Geographic Orion* meets strict specifications for environmental protection and the on board waste management systems meet the stringent Antarctic operational standards enabling us to travel to the most pristine environments. A host of advanced design features and technology ensures sustainable marine environmental practices. *National Geographic Orion* accommodates 102 guests in 53 cabins, including several with balconies. She is spacious and modern, with a variety of public rooms that offer panoramic views of the passing landscape. Friendly and informal, *Orion* fosters a welcoming atmosphere where like-minded guests share in exceptional experiences and enrichment. Her public rooms include a dramatic window-lined main lounge, as well as an observation lounge and library perched at the very top of the ship, with plentiful observation decks. The spacious lounge is

the heart of our expedition community, and is suited for spirited cocktail hours, informative presentations and our nightly tradition of Recap. In addition, a dedicated theater provides a unique setting for specialist presentations or films and slideshows. Both the main dining room and outside buffet easily accommodate all guests at once for open seating dining. On selected nights, weather permitting, our dining room menu is also available on the outside deck. While *Orion* interiors are elegant, life aboard is always casual, with no need for formal clothing. And you'll find shipboard services like laundry, in-room cabled internet, and public-area wifi make packing and traveling more

convenient.
