

SVALBARD, ICELAND AND GREENLAND'S EAST COAST EXPEDITION CRUISE

Discover the wonders of the Arctic on an epic expedition that combines the wildlife of Svalbard, the unique and remote outpost of Jan Mayen, the ice-hewn east coast of Greenland, and the stunning fjords of western Iceland. Kayak among incandescent icebergs; visit some of the most remote settlements on Earth; and watch for polar bears, walruses, reindeer, and whales on a quest to discover the Arctic's grand wilderness.

ITINERARY

Day 1 Oslo, Norway

Arrive in Oslo and transfer to your centrally located hotel. Spend the day exploring this vibrant city at your own pace. Check in with the hospitality desk this afternoon to make final arrangements before your charter flight the following day.

Day 2 Oslo / Longyearbyen / Embark Ship

Depart Oslo on a charter flight and enjoy breathtaking vistas over icy fjords and the Barents Sea enroute to Longyearbyen. On arrival to this Arctic outpost, explore the world's northernmost settlement, which has morphed from a coal mining hub to a

base for exploration and science in recent history. Witness daily life, and delve into this history, before embarking _National Geographic Resolution_ , your base for the next fifteen days.

Day 3-15 Exploring Svalbard, Greenland and Iceland

Your day-by-day itinerary, in keeping with the nature of an expedition, is a thoughtfully considered framework based on decades of experience in this dynamic Arctic region. Your team takes full advantage of an experienced captain, expedition leader and naturalists--as well as technological resources. Armed with the latest satellite imagery, they'll chart where the ice is impenetrable, and where there are leads guiding the ship to exciting discoveries. Your ship has an ice-strengthened hull and forward-searching sonar, plus agile Zodiacs and kayaks, allowing your expedition team to make forays among the icebergs. The undersea specialist deploys the ROV, bringing back imagery few, if any, have ever seen. And with unforgettable days in the ice and two photographers on board, guests have expert assistance to get their best photos ever.

Begin in Svalbard, Norway, a place of deep fjords, snowcapped mountains and massive ice sheets. Svalbard is one of the best places on the planet to see polar bears in their natural habitat--the sea ice. Venture to the foot of vast tidewater glaciers, kayak among sparkling icebergs, hike the tundra and explore fjords that split the coastline.

Svalbard's wonders are a prelude to days ahead of discoveries on unknown shores, following the ice's edge. Be on deck as your captain navigates between icebergs that drift from the calving glaciers. With a course set west, Jan Mayen is on the itinerary--an isolated volcanic island in the Arctic Ocean. Here, you'll discover the island's unique geology and black sand beaches and learn of the interesting history of Jan Mayen's past inhabitants. If the ice yields, the ship will aim for Scoresbysund on the east coast of Greenland, the longest fjord system in the world. If the ice is unrelenting, the ship will head to Iceland.

The finale of your journey is the west coast of Iceland: Ísafjarðardjup, a microcosm of life in the Westfjords with islands and wildlife around every corner including Vigur Island, home to a centuries-old tradition of eider farming.

Day 16 Reykjavík / Disembark Ship

Disembark in Reykjavik and transfer to the airport for flights home.

Please note:

Itineraries are subject to change.

YOUR SHIP: NATIONAL GEOGRAPHIC ENDURANCE

YOUR SHIP: National Geographic Endurance

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

A next-generation expedition ship, purpose-built for polar navigation. National Geographic Endurance is a next-generation expedition ship, purpose-built for polar navigation. A fully stabilized, highly strengthened, ice-class Polar Code PC5 (Category A) vessel, it is designed to navigate polar passages year-round, and safely explore unchartered waters, while providing exceptional comfort. Its patented X-BOW® is key to its design; its powerful wave-slicing action provides an extremely smooth ride in even adverse conditions, and even reduces spray on deck, for superior observation. She carries a full suite of expedition tools and offers a variety of experience-enhancing amenities. The luxury of comfort on expedition National Geographic Endurance comfortably accommodates 126 guests in 69 outside-facing cabins. Cabins are efficiently designed, with sizes range from the 140-square-foot solo cabin to the 430-square-foot category 7 suite. Fifty-three of the 69 cabins, including all 12 of the solo cabins, will feature small balconies with floor-to-ceiling sliding doors that bring in the spectacular views and ample natural light. Comfort & convenience in every room Every cabin has two portholes, a large window or balcony, and temperature controls. Bathrooms are modern and stocked with botanically inspired hair products, soap, and shower gel, plus a hairdryer. Cabins are equipped with expedition command centers with tablets and USB/mobile device docking, TVs, Wi-Fi connections, and hair dryers. Dining: Food served aboard is fresh, local, and delicious, and sourced from suppliers who share our values of sustainable use whenever possible. Meals aboard are almost always served in the dining room, located aft of the lounge deck. When weather conditions allow, lighter fare may be served on the observation deck. There is no assigned seating and our dining room accommodates the entire expedition community in a single seating. During meals your expedition leader, naturalists, and any guest speakers aboard will join you. Public Areas: Two restaurants, a Chef's Table for small group dining, Observation Lounge with bar, gym, Wellness area, infinity-style outdoor hot tubs, library, main lounge with full service bar, 24-hour beverage, state-of-the-art facilities for films, slideshows and presentations, and a photo workshop area; plus, an expedition base with lockers for expedition gear, and an "open bridge" for access to our captain, officers and the art of navigation. Meals: Two restaurants, featuring local, sustainable choices and unassigned seating for flexible, inclusive dining; plus a Chef's table for intimate, small group dining. Main restaurant has 270° views, and the Observation deck restaurant features lighter, made-to-order fare. Cabins: All cabins face outside with large windows, private facilities and climate controls. 53 cabins have balconies. Cabins are equipped with expedition command centers with tablets and USB/mobile device docking, TVs, Wi-Fi connections, and hair dryers. Expedition Tools: Zodiac landing craft, kayaks,

snowshoes, cross-country skis, undersea specialist operating a remotely Operated Vehicle (ROV) and underwater video camera for unique access to polar marine world, hydrophone, aerial remote-controlled camera and video microscope. Special Features: A full-time doctor, undersea specialist, National Geographic photographer, Lindblad-National Geographic certified photo instructor and video chronicler, an internet cafe and laundry. Wellness: The vessel is staffed by our wellness specialists and features a glass-enclosed yoga studio, gym, treatment rooms and spa relax area, and high- and low-heat saunas with ocean views. Expedition Landing Craft: Key to our operation is our fleet of expedition landing craft, which we use to land in places that would otherwise be inaccessible. With 8 of these boats and two loading stations used every time we disembark, we're able to transfer guests off the ship quickly, so you can be out on adventures, not idly waiting. The expedition landing craft we use are 19 feet long, powered by four-stroke outboard engines, and are capable of comfortably carrying 10-12 people. They are widely recognized as the safest and most versatile small boats afloat. Remotely Operated Vehicle: Capable of reaching 1,000 feet, far beyond the range of any Scuba diver, the ROV allows you to literally view parts of the undersea that are as unexplored as the moon. Chances are you, like many of our guests, will be struck by how surprisingly colorful undersea life is in these unlikely places. And this glimpse may fundamentally change how you view the ocean. Kayaks: National Geographic Endurance will be equipped with a fleet of kayaks large enough to ensure everyone who wants to can paddle at every opportunity. Consequently, prior kayaking experience isn't necessary--many of our guests have their first kayaking experience in extraordinary locations. Our custom-designed floating platform lets us deploy kayaks from the ship, or any location we want--including far from shore. Kayakers are usually free to explore where they want within boundaries set by the undersea specialist and officer of the watch. Underwater camera: Our undersea specialist will dive often during your expedition, even in Alaska, with cold-water gear, to shoot high-definition, Cousteau-like footage of the deep. Colorful nudibranchs, swimming, plant-like crinoids, and mysterious fish with antifreeze blood that thrive in the frigid sea will give you an entirely new appreciation of the marine environment. Video microscope: Naturalists will use the video microscope to help explain all elements of the environment, including tiny organisms that are the building block of the marine ecosystem. Spellbinding live views of krill at 80x magnification fills the high-definition screens in the lounge with vivid detail, and fills every onlooker with a sense of wonder at the importance of otherwise unobservable creatures. Hydrophone: This underwater microphone is deployed to listen to the vocalizations of marine mammals. Real time transmissions of their eerie, haunting sounds can be broadcast through the ship or recorded for later playback. Few experiences in nature are as captivating as watching humpback whales feed close to the ship as their vocalizations play through the ship's PA system. Electronic charts: An electronic chart showing the ship's location, course, and speed is almost always on display in the lounge. Open bridge: You'll find our captains are engaged, knowledgeable members of your expedition who are eager to share their passion with you. Venture's open bridge features comfortable spaces to sit, enjoy the view, drink your morning coffee, or simply chat with the officers. Snorkeling gear & wetsuits: On warm weather itineraries where there will be snorkeling, you'll select a mask, snorkel, fins, and wetsuit that remain yours for the duration of the expedition. There's no need

to pack and tote your own gear, although guests who prefer to are welcome to bring

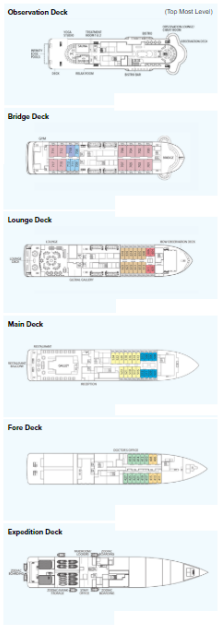

their own.
