TROMSO TO CHURCHILL - 33 DAY ARCTIC LUXURY EXPEDITION CRUISE

Experience the Arctic wilderness in its purest form. Sailing from Norway's Tromsø to Canada's Churchill, join three centuries of adventurers and fortune hunters and travel to Svalbard and into the Hudson Bay. Discover the remote and remarkable region's best-kept secrets, including the abundant art community at Cape Dorset and wildlife both above and below the waves. Take advantage of the brief summer thaw and long white nights, not to mention Silver Endeavour's all-inclusive luxury and embark on a cruise that will transform you.

Day 1 Pre Cruise

Day 2 Tromsø

Feel your heart flutter, as you catch your first glimpse of that famous emerald haze dancing across the stars, during your visit to this wonderful Arctic gateway. Located in the far north of Norway, a visit to Tromsø beckons you to the extremes of this magical country, to explore a fairytale land of jagged mountains, glistening glaciers and husky-pulled sledges. Despite its remote location, you'll discover a perhaps surprisingly cosmopolitan city, with a healthy student population injecting plenty of energy. Sat 250 miles above the Arctic Circle - at 69° north - you can bathe in the midnight sun's glow during summer, before winter brings the thick blackness and starry skies of endless polar nights. The darkness doesn't stop the fun - with a polar night half-marathon taking place in January - but the return of the sun is always a reason for a celebration here. To get the best view over the city, take the cable car to Storsteinen's amazing viewpoint. Magnificent views down over the city, fjord and Tromsø's arching bridge will unravel before you. Learn more about northerly traditions, polar expeditions and arctic hunting at the Polar Museum. The Science Centre, meanwhile, explains how humans have harnessed and survived these epic landscapes over the years, and explores Tromsø's breathtaking natural spectacle - the northern lights. The city is famed for its extraordinary viewing opportunities, which are often said to be the best in the world. The Alpine Botanic Garden is the most northern such garden on the planet, showcasing some of Norway's hardiest plantlife, which survives and thrives at this nose-bleeding altitude.

Day 3 Gjesværstappan Islands & Cruising Along North Cape & Skarsvag (Nordkapp)

Home more than a million birds that perch atop its cliffs, the Gjesværstappan islands are a marvel of nature. Gjesværstappan is a grouping of nearly one hundred islands and rocks, mostly high, steep-sided islands covered in grass that is nearly covered by seabirds. These islands were designated as a nature reserve in 1983 due to their importance as nesting grounds for many species of seabirds, some of them endangered. A birdwatcher's paradise, Gjesværstappan is noted as one of the more easily-accessed nesting areas in Europe for viewing Atlantic seabirds. It is comprised of several particularly large, tall islands, including Storstappan (rising 283 meters, or 928 feet, out of the sea), Kjerkestappen (166 meters or 545 feet) and Bukkstappen (92 meters, 302 feet). On Storstappan alone, more than one million nesting birds have been counted, and visitors are not allowed to set foot here between June and August to protect its activity as a nesting and breeding ground. The islands of Gjesværstappan are home to one of the most important colonies of Atlantic Puffins in Norway. Other birds that visitors may see include White-tailed Eagles, Arctic Skuas, Common Eider Ducks, Razorbills, Guillemots (black and common), Great Cormorants, Gannets and other species. Tour the islands from a small water craft (kayak or Zodiac) and prepare to be amazed at the splendor of the dramatic cliffs rising from the sea, vibrant and positively teeming with birdlife. Situated at the very north tip of Norway and inside the Arctic Circle, there is something very special about being (almost) at the top of the world. Called the northernmost point of Europe, the North Cape (Nordkapp in Norwegian) lies about 1,306.3 mi from the North Pole, with no dry land between except for the Svalbard archipelago. Home to where the Atlantic and Arctic oceans meet, this is the true land of the midnight sun – constant

spectacular scenic views and 24-hour sunlight lends itself to a sense of giddy informality aboard. Just imagine sipping a chilled glass of champagne at the very top of the world in full daylight at midnight – sensational. Be sure to be on the lookout for hundreds of thousands of puffins, gannets, cormorants, seals, dolphins and whales that make this stretch of chilly water their home. Not forgetting the colourful, compact fishing villages, so at odds with the otherwise this stark, barren landscape. For those who like to travel far (very far) off the beaten track, then you have found your Nordic nirvana in Skarsvag. Large, sparsely populated (there are just 60 human year round residents), and a joy to all those who revel in stark, unbridled beauty, Skarsvag also enjoys the auspicious title of being the world's most northerly fishing village. But rolling hills, prolific birdlife and arctic fjords aside, Skarsvag is above all famous for its proximity to the North Cape. Found on the island of Magerøya, the most northernmost point of Europe above the arctic circle is a bucket list basic. Stand beneath the massive metal globe and gaze out onto the Barents Sea, where the only land between you and the North Pole is the Svalbard archipelago. This is truly the land of the midnight sun – in fact, you are so far north that the sun doesn't even dip beneath the horizon between May and mid-July. The island's famous bird cliffs are quite spectacular, and home to thousands of puffins, gannets and cormorants. Those willing to hike to cape Knivskjellodden, the northernmost point on Magerøya, will be rewarded with stunning cliff face views of the North Cape Plateau. Before leaving, head into the impressive North Cape Hall for exhibitions on the North Cape's history. Travellers have been visiting since 1664, when Italian priest Francesco Negri arrived, so there are some tales to tell! More intriguingly, a tunnel has been hewn into the rock, leading down to the cliff face, complete with a chapel.

small-cruise-ships.com

info@small-cruise-ships.com

Day 4 Cruise & Explore Bear Island (Svalbard)

Bear Island is considered Svalbard's southernmost island, roughly half way between Spitsbergen and Norway's North Cape. Although the last polar bears were seen in 2004, the name goes back to Dutch explorer Willem Barentsz and his visit in 1596. The island has been used to hunt walrus, for whaling, and even coal mining has taken place. The strategic location on the border of the Norwegian Sea and the Barents Sea has led to a meteorological station being set up by Norway near Gravodden on Bear Island's north coast. Some two thirds of the island is a relatively flat plain with shallow freshwater lakes and Ramsar Wetland, while the entire island and the surrounding waters are a Nature Reserve. Bear Island has also been designated an Import Bird Area as it is a staging area for Pink-footed and Barnacle Geese and the steep cliffs south of Sørhamna are home to thousands of breeding seabirds. This is a specially protected area where Zodiacs are allowed to cruise along the cliffs around Kapp Kolthoff. In smaller amounts Atlantic Puffins, Northern Gannets, Glaucous Gulls and Great Skuas are found in between the large Black-legged Kittiwake, Little Auk, Common Guillemot and Brünnich's Guillemot colonies. The constant battering of the sea has not only created impressive sea caves and tunnels, but unfortunately the Russian vessel Petrozavodsk shipwrecked near Revdalen at the base of the limestone cliffs and the waves are causing a continuous disintegration of the remains of the ship.

Days 5 - 6 Svalbard Southern Region

Svalbard's Southern Region and specifically Spitsbergen's west coast is less ice-clogged than the rest of Svalbard due to the moderating influence of the Gulf Stream. Several fjords cut into the western coast of Spitsbergen and have been used by trappers and hunters, as well as the different mining companies

that tried to exploit the riches of the archipelago's largest island of Spitsbergen. Remains of huts and mines, as well as active commercial and scientific settlements can be found and visited. Depending on the time of the season, glaciers can be visited on foot or by sea. Hornsund will reveal fascinating views of geological formations, craggy mountains, spectacular glaciers and a variety of seabirds and seals.

Days 7 - 9 Svalbard Northern Region

Svalbard's northern region is less influenced by the Norwegian Current coming through the Greenland Sea than the southern region and shows more ice. The northern part of the island of Spitsbergen shows quite a number of impressive fjords, bays and glaciers. The Nordaust Svalbard Nature Reserve includes Spitsbergen's east coast, the Hinlopen Strait, Nordaustlandet and some islands further east like Kvitoya and Storoya. Several walrus haul-outs, spectacular glaciers, bird cliffs and bird islands, as well as surprising flora in Arctic deserts and the possibility to see polar bears and to visit historically important sites make this an area prone for exploration. Ice conditions will dictate which sites can be seen.

Day 10 Day at sea

Days at sea are the perfect opportunity to relax, unwind and catch up with what you've been meaning to do. So whether that is going to the gym, visiting the spa, whale watching, catching up on your reading or simply topping up your tan, these blue sea days are the perfect balance to busy days spent exploring shore side.

Day 11 Jan Mayen Island

Humpback and minke whales cavort and feed in the waters around the impressive volcanic island of Jan Mayen with its

The Small Cruise Ship Collection

01432 507 280 (within UK)

info@small-cruise-ships.com | small-cruise-ships.com

The Small Cruise Ship Collection

www.small-cruise-ships.com

small-cruise-ships.com

info@small-cruise-ships.com

towering ebony peaks and broad black lava beaches. The primordial landscape is dominated to the north by the 7,500 feet high (2,300 meters) Mt Beerenberg, an active volcano covered in glacial ice that last erupted in 1985. With permission from the Norwegian authorities, a landing is possible at this rarely visited outpost. Visitors may walk to the research and weather station, or beyond, for birds-eye views of the meteorological station and the long black sandy eastern shore of the island. Birds to be seen here may include Atlantic Puffins, Northern Fulmars, and Snow Buntings.

Day 12 Day at sea

Days at sea are the perfect opportunity to relax, unwind and catch up with what you've been meaning to do. So whether that is going to the gym, visiting the spa, whale watching, catching up on your reading or simply topping up your tan, these blue sea days are the perfect balance to busy days spent exploring shore side.

Day 13 Akureyri

Iceland's Capital of the North is the gateway to a thrilling land of roaring waterfalls, soaring volcanoes and glorious wildlife. It may lie a mere 60 miles from the Arctic Circle, but Akureyri blossoms with a bright, cosmopolitan feel, and explodes into life during the summer months, when its outdoor cafes and open-air bathing spots fill up with visitors ready to immerse themselves in Iceland's cinematic scenery. Feel the thundering impact of Iceland's celebrated natural wonders shaking your bones at Godafoss Waterfalls, known as the 'Waterfalls of the Gods'. Here, the Skjálfandafjót river unleashes a colossal torrent of water over charcoal-black rocks below. Or, find some peace at the Botanical Gardens, which opened in 1957 and offer space for contemplation - amid plants that bloom with unexpected

vibrancy, even at this northerly latitude. The Lutheran, Akureyrarkirkja Church rises like a grand church organ and is the town's most striking landmark. The 112-step climb is worth the effort to see light flooding in through its narrow stain glass windows, spreading colourful patchworks across the interior. Magic and mythology are important elements of Icelandic folklore, and you'll even bump into giant sculptures of grizzled, child-snatching trolls on the town's high street. Or, meet more earthly - but no less magical - creatures in the waters around Akureyi, where immense blue whales cruise by and dolphins playfully leap.

Day 14 Bolungarvik & Vigur Island

Although the Hornstrandir Nature Reserve is further north across the Isarfjardardjup, Bolungarvik is Westfjords' and Iceland's northernmost town. Despite its relative isolation, Bolungarvik has been settled for hundreds of years and is already mentioned in the settlement period of Iceland. Located next to rich fishing grounds and the cove of the same name, Bolungarvik has always been a place for fishermen and one of the town's attractions is a replica of an old fishing station. Just to the northwest is Bolafjall Mountain which blocks off the wind and swell from the Atlantic Ocean. The view from the top (at 638 meters above sea level) not only covers Bolungarvik and the surrounding valleys and mountains, but several fjords and the Hornstrandir Nature Reserve. Although only 950 residents call Bolungarvik their home, this is the Westfjords' second largest town. There even is a nine hole golf course (par 71) with 18 sets of tees. Vigur Island is the second largest island in the Isafjardardjup Fjord, measuring 2 kilometers in length by 400 meters in width. It is home to a single sheep farming family, which ferries the sheep in summer across to the mainland, so

The Small Cruise Ship Collection

01432 507 280 (within UK)

info@small-cruise-ships.com | small-cruise-ships.com

The Small Cruise Ship Collection

www.small-cruise-ships.com

small-cruise-ships.com

info@small-cruise-ships.com

that the Eider Ducks nesting on the island will not be disturbed. One of the export articles from this small island was eider down and one can still see where the Eider Ducks nest and how the down is collected and cleaned. The small settlement of a few houses is on the southern side, next to a small rocky beach, a concrete wall and floating pier. On approach grey seals can often be seen on the otherwise seaweed-covered boulders. Apart from the grey of the basalt and green of the grass, lichens add a splash of color. A path has been prepared and the grass cut, so that visitors can leisurely walk across the island to take in the beautiful scenery and to observe the large colony of Arctic Terns, Black Guillemots and Atlantic Puffins usually only seen during the summer months. A meticulously preserved historical landmark, a small windmill dating back to the 1840s was still in use in 1917 to grind wheat imported from Denmark. Viktoria House, one of the preserved wooden farm houses dating back to 1862, is used as a café where home-baked cakes and cookies are offered to guests. One of Europe's smallest post offices can be found here, too.

Day 15 Flatey Island & Stykkisholmur

Flatey is the 'flat island' just as the name sounds. These days Flatey is mainly seasonally populated with many brightly painted, wooden summer cottages to be found here. Like many other small islands around Iceland though, Flatey was once a hub for fishing and trade. This particular island prospered so much that it was the center of commercial and cultural life in the 19th century for this part of Iceland. Thanks to the surrounding nutrient-rich waters 35 species of birds have been counted on Flatey ranging from Eider Ducks and Atlantic Puffins, to Arctic Terns, Red-necked Phalaropes, Ringed Plover and Snow Buntings. Stykkishólmur, located in western Iceland at the

northern end of the Snæfellsnes peninsula, is the commerce center for the area. Its natural harbor allowed this town to become an important trading center early in Iceland's history. The first trading post was established in the 1550s, and still today fishing is the major industry. The town center boasts beautiful and well-preserved old houses from earlier times. Stykkisholmur is very environmentally conscious – it was the first community in Europe to get the EarthCheck environmental certification, was the first municipality in Iceland to start fully sorting its waste, and was the first town in Iceland to receive the prestigious Blue flag eco-label for its harbor. It has also been a European Destination of Excellence (EDEN), since 2011.

Day 16 Reykjavik

The capital of Iceland's land of ice, fire and natural wonder, Reykjavik is a city like no other - blossoming among some of the world's most vibrant and violent scenery. Home to two-thirds of Iceland's population, Reykjavik is the island's only real city, and a welcoming and walkable place - full of bicycles gliding along boulevards or battling the wind when it rears up. Fresh licks of paint brighten the streets, and an artistic and creative atmosphere embraces studios and galleries - as well as the kitchens where an exciting culinary scene is burgeoning. Plot your adventures in the city's hip bars and cosy cafes, or waste no time in venturing out to Iceland's outdoor adventures. Reykjavik's buildings stand together - below the whip of winter's winds - together with the magnificent Hallgrímskirkja church, with its bell tower rising resolutely over the city. Iceland's largest church's design echoes the lava flows that have shaped this remote land and boasts a clean and elegant interior. The Harpa Concert Hall's sheer glass facade helps it to assimilate into the landscape, mirroring back the city and harbour. Its LED lights

The Small Cruise Ship Collection

info@small-cruise-ships.com

shimmer in honour of Iceland's greatest illuminated performance – the northern lights. Walk in the crusts between continents, feel the spray from bursts of geysers and witness the enduring power of Iceland's massive waterfalls. Whether you want to sizzle away in the earth-heated geothermal pools, or hike to your heart's content, you can do it all from Reykjavik – the colourful capital of this astonishing outdoor country.

Day 17 Day at sea

Days at sea are the perfect opportunity to relax, unwind and catch up with what you've been meaning to do. So whether that is going to the gym, visiting the spa, whale watching, catching up on your reading or simply topping up your tan, these blue sea days are the perfect balance to busy days spent exploring shore side.

Day 18 Skjoldungen

Located on Greenland's relatively rarely visited rugged east coast, Skoldungen Fjord has enchanting scenery with towering mountains tipped with snow, ice-scraped valley sides and sculptured icebergs in shades of white and blue. At the top of the fjord one can easily see the retreating state of the Thrym Glacier. The U-shaped fjord offers spectacular scenery and as an extra perk, it is not uncommon to see whales in the fjord.

Day 19 Cruise Prince Christian Sound & Aappilattoq (Kujallec)

The transit through the Sound is one of this voyage's highlights. Connecting the Labrador Sea with the Irminger Sea, Prince Christian Sound or "Prins Christian Sund" in Danish is named after Prince (later King) Christian VII (1749-1808). 100 km (60 miles), long and at times just 500 m (1500 ft) wide, this majestic and spectacular fiord throws you back into a Viking era – flanked by soaring snow-topped mountains, rock-strewn cliffs

and rolling hills, it is as if time has stood still and one easily forgets that this is the 21st century. As you marvel at the sheer size of the mountains that surround you, with the Arctic waters lapping deceptively at the hull, revel in the silence enveloping you. Icebergs float serenely by, carrying with them the ages of time. Be sure to wear warm clothing as this is one spectacle that you do not want to miss. If you're looking for remote and remarkable then you have found it. Cruise through Prince Christian Sound to the western end and you'll find Aapilattoq, a (very) small Greenlandic village of just 100 inhabitants. The name of the village means "sea anemone" in the local Greenlandic language, and the fact that the village has retained its Inuit name is a good indication of what you can expect; traditional village life much as it has been for the past 100 years. Hunting and fishing are the main occupations here, and it is not unusual when taking a stroll through Aappilattoq, past the small school (where 22 pupils from ages 3-16 are enrolled) and church, to come across a polar bear skin drying in the wind behind a local dwelling. The village is hidden behind a prominent red rock and towering mountains, which make the village virtually inaccessible by land. Naturally, the Aapilattoq and its surrounding area are phenomenally rich in Arctic wildlife: Arctic fox and Arctic hare live in the countryside around the village while marine mammals include ringed seal, harbour seal, hooded seal, bearded seal, harp seal, humpback whale (typically in summer), minke whale, fin whale, narwhal, and beluga.

Day 20 Qaqortoq (Julianehåb) & Hvalsey

The largest town in southern Greenland, Qaqortoq has been inhabited since prehistoric times. Upon arrival in this charming southern Greenland enclave, it's easy to see why. Qaqortoq

The Small Cruise Ship Collection
www.small-cruise-ships.com

01432 507 280 (within UK)

info@small-cruise-ships.com | small-cruise-ships.com

The Small Cruise Ship Collection

www.small-cruise-ships.com

small-cruise-ships.com

info@small-cruise-ships.com

risers quite steeply over the fjord system around the city, offering breath-taking panoramic vistas of the surrounding mountains, deep, blue sea, Lake Tasersuag, icebergs in the bay, and pastoral backcountry. Although the earliest signs of ancient civilization in Qaqortoq date back 4,300 years, Qaqortoq is known to have been inhabited by Norse and Inuit settlers in the 10th and 12th centuries, and the present-day town was founded in 1774. In the years since, Qaqortoq has evolved into a seaport and trading hub for fish and shrimp processing, tanning, fur production, and ship maintenance and repair. 18 kilometers northeast of Qaqortoq, Hvalsey is part of Qaqortukuloq, one of the five sites of the UNESCO World Heritage Arctic farming complex Kujataa. Between Eriksfjord to the north and Einarsfjord to the south, the Hvalseyfjord branches off from Einarsfjord. Although Hvalsey is better known for the well-preserved ruins of one of the sixteen churches in the Norse's Eastern Settlement, the church was in a farmstead known as Thjodhild's Stead. This farmstead at the northeastern end of the fjord included a large building with living quarters, a hall and livestock pens, as well as other livestock pens, a storage building and a warehouse –the ruins of which can still be seen. The Norse farming laid the foundation for the Inuit farming in later centuries, leading to the UNESCO World Heritage status in 2017. In the 14th century account "Descriptions of Greenland" the abundant fish, a reindeer farm on Reindeer Island and Hvalsey's name "Whale Island" clearly indicate that the Norse had ample food sources at that time. The church was built in the Anglo-Norwegian style of the 13th century, but is known to have been built over an older graveyard. The farmstead is mentioned in the Icelandic "Book of Settlements" as property of the Kings of Norway, and the last documented event of the Norse in Greenland is a wedding which took place

in the church in September 1408. After almost 600 years of abandonment, conservation work had to be done to prevent the seaward wall from collapsing.

Day 21 Day at sea

Days at sea are the perfect opportunity to relax, unwind and catch up with what you've been meaning to do. So whether that is going to the gym, visiting the spa, whale watching, catching up on your reading or simply topping up your tan, these blue sea days are the perfect balance to busy days spent exploring shore side.

Day 22 Nuuk (Godthab)

In the bustling capital city of Greenland, you could be forgiven for forgetting you are in such a vast and isolated country. Nuuk is Greenland's economic and social hub, home to more than a third of Greenland's population, and although it feels like a world capital, scratch the surface, and a uniquely Greenlandic character can be found underneath. Nuuk Cathedral overlooks the gorgeous old Colonial Harbour district and the Greenland National Museum, resting place of the legendary Qilakitsoq mummies, the true highlight of the museum's archaeological collection. Above the Colonial Harbour sits downtown Nuuk, with lines of Scandistyle apartments, a bustling shopping district, the Greenlandic Parliament, Nuuk City Hall (which welcomes visitors to see its artwork) and even outdoor cafes selling locally produced food and beer. These nods to modernity compete for space with local artisan boutiques, the meat market selling the catch from Nuuk's vast fjord-lands, and the stunning Katuaq Cultural Centre, where blockbuster movies, as well as local and foreign performers entertain the people of Nuuk. Although Nuuk has long been a melting pot of Danish and Greenlandic ideas, this is a city where Greenland displays its sophistication, with

the Country's only traffic lights, roundabouts and University. Most of all, expect to find a multitude of friendly people who are proud of who they are, and equally proud of the city they call home.

Day 23 Day at sea

Days at sea are the perfect opportunity to relax, unwind and catch up with what you've been meaning to do. So whether that is going to the gym, visiting the spa, whale watching, catching up on your reading or simply topping up your tan, these blue sea days are the perfect balance to busy days spent exploring shore side.

Day 24 Iqaluit (Nunavut)

Iqaluit is the capital of Canada's newest territory, Nunavut, which is Inuktitut for "our land". The community is located at the head of Frobisher Bay, an inlet of the North Atlantic extending into southeastern Baffin Island. The Bay is so long that it was first taken to be the possible entrance of a Northwest Passage. In Iqaluit, the Nunatta Sunakkutaangit Museum and the Nunavut Legislative Assembly Building both house incredible collections of Inuit artwork with interesting local prints for sale in the museum shop.

Day 25 Lady Franklin Island & Monumental Island

Named in honour of Sir John Franklin's widow, the lonely and uninhabited Lady Franklin Island lies off of Baffin Island's Hall Peninsula at the entrance to Cumberland Sound. The island is named for the wife of Sir John Franklin, the Arctic explorer who died trying to discover the Northwest Passage. The geology of the island is striking with vertical cliffs of Archean rocks, likely to be some of the oldest stone in Canada. The waters around Lady Franklin Island offer an abundance seabirds, ducks, seals, and

walrus. With a bit of luck it is possible to see Atlantic Puffins here and perhaps even a rare Sabine's Gull. Monumental Island is a splinter of ancient metamorphic rock, hunching in the frigid waters of the Davis Strait, defying the ocean and ice around it. Named to honour the legendary Polar Explorer Sir John Franklin, the island displays at times displays everything Nunavut has to offer, in an ocean studded with vast icebergs drifting across from Greenland. Monumental Island is a well known den site for polar bears, the icon of the Arctic; there is a good chance to see mother bears with cubs on the island, as the bears become trapped by the lack of summer ice, using the island as a base to hunt until the ice returns in the Autumn. Seeing the white silhouette of a polar bear against the ancient black rock and autumn tundra colours is an experience that will remain long after returning on board. Groups of harp seals are a common sight in the waters around Monumental Island, and can be very curious, often swimming very close to investigate new objects such as boats. There are several sites on the island also used as haul out sites for the charismatic Atlantic Walrus. These vast animals are surprisingly gentle and skittish, and can often be observed caring for their calves on the rock bluffs while keeping a careful watch for polar bears. Almost nowhere else in Nunavut can the charismatic wildlife of the Arctic be observed in such a stunning setting.

Day 26 Akpatok Island (Nunavut)

Akpatok Island is a remote spot near the northernmost limits of the Labrador Peninsula. Steep and sheer limestone cliffs jut out of icy waters. Encased in snow and surrounded with sea ice in the winter months this uninhabited island lures huge amounts of wildlife most notably the world's largest population of breeding Thick-billed Murres (known as Brünnich's Guillemots in Europe)

The Small Cruise Ship Collection

www.small-cruise-ships.com

01432 507 280 (within UK)

info@small-cruise-ships.com | small-cruise-ships.com

The Small Cruise Ship Collection

small-cruise-ships.com

info@small-cruise-ships.com

estimated at well over a million birds. These auks flock to the bare cliffs of the island between June and September and murres incubate their single pear-shaped egg on the cliff ledges. Glaucous Gulls can be seen soaring above looking for unguarded eggs and chicks while Black Guillemots paddle around on the nearby sea. Akpatok Island is also a favorite summer home for polar bears as they wait for the winter ice to form.

Day 27 Kimmirut (Lake Harbour)

Kimmirut is a traditional Inuit hamlet of 455 people, located on the southernmost peninsula of Baffin Island, just across the Hudson Strait from mainland Québec. It is the southernmost community on Baffin Island. The name, translating as "the heel", is named for a distinctive rocky outcrop that looks exactly like the back of your foot! First contact with Europeans occurred around 1000 AD when Dorset and Norse sailors from Greenland interacted. Intermittent contact continued between the Thule people and the Vikings for another 500 years. Interactions increased as fur hunters ventured farther and farther north, whalers came to Hudson Strait in search of bowhead whales, and Anglican missionaries arrived across the bay from the community in 1900. In 1911, the first Hudson Bay trading post on Baffin Island was built in Kimmirut. Today, Kimmirut, formerly named Lake Harbour, is home to over four hundred people who preserve a traditional way of life, with a thriving culture of arts and crafts, including stone carving, ivory scrimshaw, and jewellery making using many gemstones native to this area.

Day 28 Cape Dorset (Dorset Island)

Cape Dorset is a small Inuit hamlet located on Dorset Island off the southern shore of Baffin Island. The traditional name for Cape Dorset is Kinngait (meaning "high mountain") describing

the 'Cape' which is actually a 800 foot mountain. This is a nature-lovers paradise with breath-taking landscapes and an amazing abundance of arctic wildlife such as migratory caribou seabirds whales seals and walrus. Ancient native Thule (Dorset Culture) peoples lived in this area for three thousand years and it is here where the first archaeological remains were found. Captain Luke Foxe during his attempt to find the Northwest Passage in 1631 was the first European to land here. He named the Cape in honour of his sponsor Edward Sackville the Earl of Dorset. In 1913 the Hudson's Bay Company started a trading post exchanging furs and skins for supplies like tobacco ammunition flour gas tea and sugar. In 1949 the market for white fox collapsed but the art industry boomed. Since the 1950s Cape Dorset the "Capital of Inuit Art" has become an economic mainstay of the community with more than 20% of it residents employed in the arts.

Day 29 Coats Island, Nunavut

Day 30 Day at sea

Days at sea are the perfect opportunity to relax, unwind and catch up with what you've been meaning to do. So whether that is going to the gym, visiting the spa, whale watching, catching up on your reading or simply topping up your tan, these blue sea days are the perfect balance to busy days spent exploring shore side.

Days 31 - 32 Churchill, Manitoba

Archaeological evidence around Churchill indicates the former presence of Pre-Dorset, Dorset and Inuit groups, with the earliest date going back some 4,000 years. On the western shore of Hudson Bay and at the mouth of the Churchill River, Churchill became an important base for the Hudson's Bay

Company and the fur trade. Two forts were built in the early 18th century, both on the Canadian National Historic Site list. A Parks Canada Visitor Center in the VIA Rail Station shows exhibits of the human and natural history. Today Churchill is a town of about 1,000 inhabitants which can only be reached by rail on land, by air, and in the case of ships only between July and November. The deep-sea port facilitates primarily the transport of Western Canadian grains. Once the ice breaks up in the Churchill River Basin, beluga whales come to feed and rest by the hundreds. With sub-arctic tundra and boreal forests, the area between Churchill and Nelson River to the south is well-known as polar bear country. Churchill even has a Polar Bear Holding Facility, better known as the Polar Bear Jail.

YOUR SHIP: SILVER ENDEAVOUR

YOUR SHIP: Silver Endeavour

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

Designed for polar exploration, Silver Endeavour breaks the ice of luxury expedition travel. Built to PC6 Polar Class specifications - one of the highest Polar Class classifications there is - Silver Endeavour revolutionises our expedition voyages, and allows travel deeper to some of the planet's farthest flung coasts. Her statistics speak for themselves: from unrivalled, industry-leading crew-to-guest, zodiac-to-guest and expert-to-guest ratios, to cutting-edge navigation and exploration technology and hallmark Silversea comfort make her the most luxurious expedition ship ever built. Spread over eight public decks, not only does she feature ample onboard space, multiple restaurants, plus a huge choice of bars and lounges, but her large and luxurious suites are some of the best in expedition cruising. Superbly designed, all her suites feature a balcony and our highest standards of service thanks to an impressive crew-to-guest ratio of 1:1. Mud Room Silver Endeavour's Mud Room is the perfect place to prepare for all your expedition activities. Spaciously designed, the two mud rooms are superbly modern, and equipped with state-of-the-art equipment. Explorer Lounge Strategically located mid-ship on deck 4, the Explorer Lounge is the operational heart of shore

excursions while onboard. This is where you'll attend your daily recap and briefing sessions or attend lectures. Connoisseur's Corner The Connoisseur's Corner is an indulgent and sophisticated cigar lounge, where you can enjoy an after dinner drink in a cosy private club atmosphere. Otium Spa Otium is where you can relax and unwind, but also where you can enjoy world class treatments that make sure you look as good as you feel and that even Venus herself would envy. Observation Lounge The Observation Lounge offers one of our favourite vantage points of Silver Endeavour. Plus 270-degree surrounding glass windows make this immersive venue ideal whatever time of the day. Beauty Salon Our committed and competent team of beauty therapists is here to help keep your hair, nails, skin, and body healthy and happy. Fitness Centre Whether you are a serious keep fit fanatic or casual athlete, you'll find what you're looking for in Silver Endeavour's Fitness Centre. Expertly designed classes and personal training sessions make sure that you keep in shape. Boutique Located mid-ship on Deck 5, the Boutique aboard Silver Endeavour means luxury shopping experiences do not end just because you're at sea! Carefully selected partners offer a wide selection of the latest fashions. Pool Deck Surrounded by glazing extended all the way to the top of the venue, the Pool Deck gives you the feeling of always being connected to the sea. The glass-enclosed pool deck is the ideal place to enjoy breathtaking views. Library Whether you're an avid bibliophile or simply prefer a quiet place while at sea, it's hard not to fall in love with Silver Endeavour's onboard library, with its beautiful reference books, comfortable chairs and
