

VANCOUVER ISLAND'S WILD SIDE (NORTHWEST)

Embark on a tour of Vancouver Island's rugged and beautiful north coast This trip is for those who love to adventure beyond the norm. It explores a mostly un-roaded area. You'll walk in the rainforest, beach-comb on the sand, boat into wild creeks that empty into the sea, and cruise around Brooks Peninsula, which juts out almost to the offshore continental shelf. Highlights include Brooks Peninsula (a glacial refugium), Solander Island (home to puffins), Kyuquot Sound (including sea otters and the village of Kyuquot), lush inlets and sandy beaches, as well as a cruise around the northernmost tip (Cape Sutil) and on the protected eastern coast. Seven miles off Brooks, the coastal world changes to the oceanic one, and on a fair day we might cruise to the shelf, where the ocean turns from green to blue, and wildlife goes to feed in the upwelling (whales, seabirds, and dolphins). _Some departures may have slightly modified itineraries. Please confirm the itinerary with an Expedition Specialist._
